To our Friends and Patrons,

In presenting this our 1939-40 General Catalogue, we tender our sincere thanks for the confidence and support bestowed upon us.

It will be noticed that many new varieties of the best trees, plants and seeds are included in our stocks this year, and that our prices of seeds have been considerably reduced.

With the assurance that our Clients will receive the most prompt and careful attention at all times, we trust that we may be favoured with their continued patronage and also kind recommendations to friends.

Yours faithfully,

MARICO NURSERIES.

Proprietors : Gebhard & Kandler.

BUSINESS NOTES.

The prices in this Catalogue are subject to revision without notice, and this Catalogue cancels all previous lists issued by us. We always presume that our customers, all of whom have our Catalogue, have perused our business notices and agree to the conditions of sale given therein.

Every order should give full forwarding instructions, if by rail or post, which station or post office. Please write clearly and distinctly your name and address, and **use enclosed order forms** to facilitate despatch.

Packing.—All trees and plants are packed and despatched under our personal supervision. A small charge is made to cover cost of material and all packing is carried out in a thorough manner. Although in some cases we pay railage to the destination station or siding, we accept under no circumstances any responsibility as to safe delivery.

Remittance.—It is respectfully requested that all orders from unknown correspondents be accompanied with Remittance. Please do not cross Postal Orders without adding bank exchange.

Customers making their own selection from this catalogue are requested to give a few supplementary names, so that we may be able to complete the order, in case any of the first mentioned should be sold out. If no such list is given, we will give substitutes of the nearest varieties or size, unless advised not to do so.

Conditions of Sale.—It is expressly agreed that should any goods sold by us prove untrue to name and label, we undertake either to replace such individual article or refund the price paid therefor, and that no other or further liability for loss or damage, directly or indirectly, will rest with us. Only on these conditions are orders accepted.

Cancellation of booked orders will be accepted up to May 15th, after that date we reserve the right to accept cancellations. We further stipulate that in cases of orders booked for delivery at a later date we shall not recognise any liability in the event of failure to effect delivery on that date agreed upon, if such failure be caused by the trees failing to grow to standard size owing to adverse weather or other conditions beyond our control.

All goods are offered subject to being unsold on receipt of order.

FRUIT TREES.

We specialize in all leading old and new varieties, and our stocks comprise from 100,000 trees upwards in various stages of growth. Our Nursery is annually inspected by Government Officials, and Customers are assured of receiving clean trees.

Our trees, being grown in one of the driest climates of the Union consequently progress favourably in any other part of South Africa. With a highly suitable soil, and frequent transplantings of the young stocks, we are able to raise trees with a most perfect root system, thus reducing the risk in transplanting considerably. We cater for the small ploholders, as well as the large commercial planter, and we are always pleased to give advice and to submit special quotations for large quantities of trees.

 BENONI,

15-1-38.

The Fruit Trees I had from you 18 months ago are doing splendidly.

COLLECTION OF FRUIT TREES.

We often receive letters from Plotholders desirous of planting fruit trees to supply their household requirements. As the majority of clients are not conversant with the different varieties, we have decided to offer the following collection of trees and will select carefully in each case trees suitable for the particular climate and varieties ripening consecutively, so as to ensure an evenly distributed supply of fruit over a long period.

This Collection consists of 12 trees comprising the following: 1 each Almond, Apple, Pear, Apricot, Nectarine, Quince, Peach, Vine and 2 each of Plums and Figs. For the Citrus Belt an Orange and Lemon can be submitted in place of Fig and Plum.

Price per Collection from Open Ground for Winter Planting: Delivered railage paid or post free. Extra sized trees, 25/-; First sized trees, 18/-; Second sized trees, 14/-.

Price per Collection of Trees in tins for summer planting: Free on rails Marico. Extra sized trees, 35/-; First sized trees, 30/-.

PRICES OF FRUIT TREES FROM OPEN GROUND

5% can be deducted if Cash is sent with Order.

Railage or Postage prepaid on all orders of Fruit Trees per dozen, per hundred and by taking larger quantities. (Within the Union).

(Except trees in tins).

Special Quotations for large quantities.

APPLES, PEACHES, NECTARINES, APRICOTS, ALMONDS, WALNUTS, PLUMS, QUINCES and FIGS.

			Each.	Per dozen.	Per 100.
Extra size trees		3—4 yrs. 4—7 feet	2/6	25/-	£7-10-0
First size trees		2—3 yrs. 3—5 feet	1/9	18/-	£6-0-0
Second size trees		1 yr. 2 ft. 6in.	1/3	13/6	£4-10-0

PEAR TREES.

Extra size		3 yrs. 4—5 feet	2/6	25/-	£8-10-0
First size		2—3 yrs. 3—4 feet	2/-	22/-	£7-10-0
Second size		1 yr. 2 ft. 6 ins.	1/9	19/-	£6-10-0

CITRUS TREES.

Extra size		2½ yrs. 3—4 feet	2/6	27/6	£10-10-0
First size		1½ yrs. 3 feet	2/3	25/-	£9-0-0
Second size		1 yr. 2 feet	2/-	21/-	£7-10-0

Figs and Quinces, large fruiting varieties for Hedges, can be supplied at £3 per hundred.

Our Fruit Trees are liberally graded, but Walnuts and Figs being more sturdy are not such vigorous growers, and while we pledge ourselves to supply these varieties of trees at the age mentioned in our foregoing price list, we are unable to adhere strictly to the heights stated above, and these trees will generally be found a little under the prescribed heights.

What Size Trees to select.—For home gardens the extra size trees we offer is the most logical choice, because they give quickest results and come into bearing much sooner. Those contemplating a large acreage may be interested in smaller size trees, and if a list of your actual requirements is sent us, we will be pleased to submit our lowest quotations.

Planting Time of Deciduous Trees.—From open ground, June to beginning of September, except Chinese Peaches and Almonds, which should be planted before the 15th of August, as the sap rises earlier in these varieties. Apple Trees can be planted till the end of September, but it is always advisable to plant as early in the season as possible, as a tree planted in June or July has time to develop fresh fibrous roots before it starts to grow.

Booking Orders.—Orders may be booked at any time of the year. We will then forward when advised, or at the proper season for planting. No extra charge is made. Our stock of Trees and Roses is increasing yearly, but owing to greatly increased demand for our Trees we expect to be sold out of several lines before the end of the season. Customers are therefore well advised to order early to avoid disappointment.

PRICES OF FRUIT TREES IN TINS.

Special Quotations for large quantities.

Available from October till March for Summer Planting.

CITRUS TREES, PEARS, CHERRIES and MULBERRIES.

Extra Size Trees : In 4 gallon tins, well established, with nice bushy heads,
3/9 each; 40/- per dozen, f.o.r. Marico.

First Size Trees : 3/3 each; 35/- per dozen, f.o.r. Marico.

PEACHES, NECTARINES, ALMONDS, JAPANESE PLUMS, QUINCES, FIGS, APPLES, APRICOTS, WALNUTS.

Extra Size Trees : 3/3 each; 35/- per dozen, f.o.r. Marico.

First Size Trees : 2/9 each; 30/- per dozen, f.o.r. Marico.

Planting Trees out of Tins should be much more generally practised, as it ensures an unfailing chance of growth, especially with Citrus Trees in districts which are subject to Winter Frosts. Trees planted out of tins do not need to be pruned back after planting. We stock a number of trees in different varieties established in tins, but customers requiring quantities established in tins are advised to book such orders two or three months ahead.

WINDHOEK.

28-7-38.

The Trees I ordered arrived in good condition and I thank you for your prompt service.

HINTS ON PLANTING TREES.

Care of Trees on arrival.—If not ready to plant at once, deciduous trees can be kept in the following way, until a convenient time for planting arises. After unpacking the trees, dig a trench in a shady place and heel in by carefully covering the roots of the trees with soil, and giving a good watering immediately afterwards. Citrus trees cannot be treated in this way, and it should be at all times arranged to have Citrus trees railed when all preparations for planting have been completed.

Planting.—Should be carefully done, holes to be dug 3 x 3 feet, two feet deep, but the ground below that depth requires to be loosened for another foot. The roots of the trees must be examined and all bruised or broken portions cut off with a sharp knife or shears. The trees are then planted the roots spread out in their natural direction, then soil thrown into the hole and well worked into the roots, after that a couple of buckets of water may be thrown in and when that has disappeared the hole can be filled in level with the surrounding land. The trees after planting should stand as high above the ground as they did in the nursery and in the case of Citrus trees 3 inches higher. Deep planting of trees is fatal.

Pruning of Fruit Trees after Planting.—Deciduous and Citrus Trees.—Cut the main shoot down to about knee high on single stemmed yearling trees. On older trees cut the centre shoot to about 3 or 4 feet and shorten the side shoots 6 or 12 inches from the main stem. Walnuts and Figs do not require any cutting.—Vines: The main shoot of vines must be cut back to about 13 inches from the main stem, or runner. Older and well branched Vines do not need to be cut quite so short.

Citrus Trees need shading after planting.—This is best done by tying dry grass round the stem of each tree, just allowing the top of the tree to project. This shading should be put on immediately after each tree has been planted and left until the tree shows signs of sprouting, when it can be removed during a cloudy day. Citrus Trees planted out of tins do not need to be shaded or pruned.

PLANTERS' TABLE.

SHOWING NUMBER OF TREES REQUIRED PER ACRE.

Distance apart in feet.	Number of Plants.	Distance apart in feet.	Number of Plants.
30	48	18	134
28	55	16	169
26	64	14	222
24	75	12	302
22	90	10	435
20	100	9	680

Distance to plant apart in feet: Apples and Pears, 24 x 24 feet; Peaches Nectarines, Apricots and Plums, 20 x 30 feet; Almonds, 24 x 24 feet, for wind-breaks, 12 x 12 feet; Cherries, 24 x 24 feet; Quinces and Figs, 16 x 16 feet; Walnuts, 30 x 30 feet; Citrus trees, 24 x 24 feet; Vines, 5 x 5 feet; Mangoes and Avocado Pears, 24 x 24 feet; Loquats and Mulberries, 24 x 24 feet. Quinces and Figs for hedging, plant 3 feet apart. For smaller house garden the distances given can be reduced by half.

APPLES. — APPELS.

(For Prices see Pages 2—3).

Plant 24 x 24 feet apart.

All Apple Trees offered by us are guaranteed worked on blight proof stocks, and are budded ten to twelve inches above the ground.

Abbreviations: "C" Cooking; "D" Dessert Varieties.

UTRECHT BEAUTY (D), a new introduction, a most profitable variety, a wonderful heavy cropper, fruit medium sized yellow, streaked red on sunny side. Tree of vigorous growth and an early bearer. Yearlings 2/6; larger size, 3/6 each.

EARLY SUMMER VARIETIES. — VROEE SOORTE.

ALMA (D), Fruit medium size, nicely coloured, fine flavour; bears very young. December. Does well in warm climates.

CHRISTMAS (D). Also called "Lady" or "New Year Apple." Well coloured, middle sized, early fruit. Tree abundant bearer.

DUTCH TULIS (D). Colour deep red. Tree bears young, fruit middle sized, oblong.

EARLY HARVEST (D). Medium to large, pale yellow, early, regular bearer, moderate grower.

MID-SEASON VARIETIES. — MIDSEISOEN SOORTE.

GRAVENSTEIN (D). Large, greenish yellow striped red, one of the best flavoured apples, bears well.

VEREENIGING.

25-7-38.

I received the Fruit Trees in excellent condition.

JONATHAN (D). Flesh white tender and juicy, aromatis. Fruit yellow, brilliant red on sunny side. Slender growth, free bearer, does well in the Highveld and Lowveld alike. Good exporter.

STEWARDS SEEDLING (D). Fine grower, early bearer. Fruit flattened, skin bright yellow, excellent keeping qualities. Stores well and a good shipper.

TAYLOR'S SEEDLING (D). Large, bright pink, heavy bearer.

WHITE WINTER COLVILLE (D). Large, piquant flavoured, excellent table fruit. The most expensive and sought after variety of the European fruit trade. Tree extraordinary early and heavy bearer.

LATE WINTER VARIETIES. — LAAT SOORTE.

APPLE OF COMMERCE (D). Fruit large, solid and of perfect shape, prolific, good keeper.

BLACK BEN DAVIS (D). Beautiful, solid red colour, fine quality, good keeper, sure cropper, excellent shipper.

CARTERS, BLUE (D). Large sized fruit of pale green colour striped red. Strong grower and reliable bearer. Good for export.

CLEOPATRA (D). A large yellow apple. Flesh tender and melting, a heavy and continuous cropper.

- DELICIOUS (D).** A beautiful apple, of exquisite flavour; one of the best late export apples. Colour yellow with lively red stripes.
- KING OF TOMPKINS COUNTY (CD).** Large, striped yellow and red, flesh juicy and of good flavour. Good grower. Good shipper.
- LONDON PIPPEN (CD).** Medium to large, green tinged with red.
- LORD WOLSELEY (CD).** Large green heavy bearer, good cooking and desert nearly blightproof.
- MINISTER VON HAMMERSTEIN (D).** Fruit large, yellowish splashed red. Tree free growing and exceptionally young and heavy bearer.
- MISSOURI PIPPEN (C).** Large, pale yellow, splashed red.
- NORTHERN SPY (D).** Regular, good bearer, large greenish yellow, fine grained, crisp, sub-acid, blightproof.
- OHENIMURI (CD).** Hardy grower, good bearer, fruit above medium size. Bright yellow, excellent keeper.
- REINETTE DU CANADA (D).** Large and handsome, greenish yellow, shows well. Table and cooking. March to May. Suitable for the Bushveld.
- ROME BEAUTY (D).** Late Bloomer, fruit large, with carmine stripes. Suitable for warm climates.
- VERSFELD'S (CD).** Large, red, of good quality. Does well in warm climates.
- WEMER'S HOEK or LATE BLOOMER (D).** Hardy, prolific, medium dark red, well-known, good keeper. Good for warm climates.
- WHITE WINTER PEARMAINE (D).** Finest dessert apple in cultivation, large yellowish rosy cheek, keeps well. Good in hot climates.

PEARS. — PERE.

Plant 24 x 24 feet distance. — All trees worked on Wild Pear Stock.

(For Prices see Pages 2—3).

EARLY VARIETIES — VROEE SOORTE.

- DECEMBER.** The earliest, heavy bearer.
- CLAP'S FAVOURITE.** Large pyriform vinous flavour.
- SOUVENIR DU CONGRESS.** Early to midseason, large to very large fruit, juicy and of fine flavour. Bears early.
- SWEET SUMMER SAFRAAN.** An old colonial variety.

MIDSEASON VARIETIES. — MIDSEISOEN SOORTE.

- BONCHRETIEN WILLIAMS.** Very large, melting, good bearer. Fruit pyriform green, changing to yellow when ripe reddish on sunny side.
- BEURRE HARDY.** Large handsome fruit, rich flavour.
- BEURRE BOSC.** Large and of good quality, yellow splashed with russet, good keeper.
- BEURE D'AVRIL.** Medium sized fruit, yellow, covered with brownish red dots.
- CAPIAUMONT.** Large yellow fruit, strewed with reddish brown russety spots.
- DOYENNE DE COMICE.** Large, pyriform, skin yellow with patches of brown, delicious rich flavour.
- LOUISE BONNE OF JERSEY.** Yellow with red cheek, juicy, excellent flavour.
- LE COMTE.** Large yellow, fine grower, good cropper, used for cross-polonising and of fine Hybrid.

LATE VARIETIES. — LAAT SOORTE.

- JOSEPHINE DE MALINES.** Greenish yellow, red on sunny side. Flesh melting and of fine flavour.

KEIFFER HYBRID. Large yellow, red, cheek, buttery, firm, good keeper. March. Stores till September. Does well all over South Africa.

PACKHAM'S TRIUMPH. Nicely shaped fruit, large and of very good quality, prolific, bearing heavily even on young trees.

WINTER NELIS. Medium sized, round, yellow fruit, with russet spots, melting vinous, very aromatic moderate grower and good bearer.

HERTZOGVILLE,

1-6-37.

Ek is baie tevrede met die groot vrugtebome wat ek verlede jaar van u ontvang het. Hulle is al groot en sterk.

FREESTONE PEACHES. — LOSPIT PERSKES.

Plant 20 x 20 feet distance. — Worked on Yellow Peach Stocks.

(For Prices see Pages 2—3).

THREE NEW VARIETIES OF LATE FREESTONE PEACHES.

The undermentioned varieties we have imported from Italy, and same are very highly recommended in the country of origin. The name given by the raisers, "Tos China," may lead one to think that these are Chinese Peaches, but they are hybrid varieties, possessing the high bearing qualities of the Chinese strains together with the fine flavoured round fruit of the European and American varieties of peaches. All three kinds bear a profusion of fine well coloured fruit, measuring about three inches in diameter, with sweet juicy flesh, completely free from the stone. They have proved themselves to bear abundantly in the Highveld as well as the Lowveld and can be recommended with confidence.

TOS CHINA FEBRUARY. Flesh creamy white, large roundish fruit, turning red on the sunny side. Tree vigorous grower and early bearer, ripens end of February.

TOS CHINA MARCH. This tree of slender growth is a most prolific bearer, carrying highly coloured fruit which ripens about 2—3 weeks later than the foregoing.

TOS CHINA APRIL. One of the latest of all peaches, and certainly the most tasty of the late varieties. Its deliciously flavoured fruit is of very large size and beautifully coloured. A special feature of this variety is that the fruit will store readily for longer than a week in an ordinary room, without losing its flavour or colour.

PRICES: Yearlings, 1/6 each; 15/6 per dozen; £5-5-0 per hundred.

Two-year olds, 2/- each; 20/- per dozen; £6-5-0 per hundred.

Three-Four-year olds, 2/6 each; 25/- per doz.; £7-10-0 per hundred

TRIAL COLLECTIONS of three trees, one of each variety:—

Yearlings at 4/6; Two-year olds, at 5/6; Three-year olds at 7/- per collection.

EARLY VARIETIES. — VROEE SOORTE.

BRIGG'S RED MAY. Very early white, nearly covered with red blush; first quality. December. Good shipper. Partial free-stone.

COTE D'AZUR. A seedling from Amsden & Sneed, ripe ten days before Early Alexander; enormous well coloured fruit of best quality.

DUCHESS OF CORNWALL. Very early, bears well, good grower. Very pretty, best quality fruit.

DUKE OF YORK. Excellent flavour and good size; highly coloured, very early. The best Export Peach for the Highveld, as it ripens in time to catch the European Christmas market.

EARLY ALEXANDER. Large, beautiful, very juicy and melting. Ripens end of November. Good exporter.

EARLY RIVERS. Large oval fruit, skin pale yellow with streaks, rich and juicy good bearer, ripens when the earliest peaches are finished.

GREEN'S BORO. Creamish yellow with blush streaks on sunside, large to very large, of excellent quality. Ripens middle of November.

INKOOS. Ripens early in November. Fruit medium sized, juicy and melting, colour whitish green. Has been successfully exported.

LE VAINQUEUR. Ripe 2 to 3 weeks before Alexander, large, well coloured; will always command best prices. Suitable for export.

MAYFLOWER Very early, ripe 15 days before "Alexander," large superb carmine colour all over, excellent quality, very free bearer. Suitable for export.

SNEED. Very early, good bearer, large, well flavoured fruit.

WATERLOO. Very good early peach, partial freestone. November to December. Good for export.

MIDSEASON VARIETIES. — MIDSEASON SOORTE.

BELLE BEUCE. Large, deep red all over, flesh white juicy and rich, red at stone.

BROOKS. Yellow skinned, almost entirely covered with deep red blush, a Bushveld variety.

CRIMSON GALANDE. Flesh tender and melting, stained red round the stone. Fruit large. Tree a free grower. Ripens January.

DR. HOGG. Heavy certain cropper, large and very pretty, melting. One of the best. January. Good shipper.

ELBERTA. Largest size, round, very showy, yellow flesh, melting, juicy. January to February. Especially suited for export. One of the best.

MAMIE ROSS. Flesh white, semi-cling, extra large, ripens January. Does well in warm climates.

MILLION DOLLAR PEACH. Much larger than "Elberta," round, uniform shape; colour rich golden yellow overlaid with carmine, deliciously flavoured, unusually long keeper. Ripens a week ahead of "Elberta."

MOUNTAIN ROSE. Good flavour and colour, bears well, early mid-summer.

PEREGRINE. Productive, fruit large and handsome, colour brilliant crimson highly flavoured. Good exporter.

HAMMANSKRAAL,

7-12-37.

You will be surprised to see the height of the fruit trees I got from you last year, and they have quite a number of fruit on.

LATE VARIETIES. — LAAT SOORTE.

GLADSTONE. Heavy regular cropper, good colour and fine quality. Very late.

LATE CRAWFORD. Very large, roundish yellow with dark red cheeks, Flavour rich and excellent for market and drying. February.

MUIR. Fruit very large, flesh yellow and sweet, late, the best for drying and canning. Good for export.

SALWAY. Large, round, yellow, deep carmine cheek, buttery. Travels well, for drying, etc. Very late.

CLING STONE PEACHES. — VASPIT PERSKES.

- PALORA.** A new peach, clingstone, fruit highly coloured of an enormous size. Flesh rich yellow, aromatic and of fine flavour. A canning Peach par excellence. Ripe end of January to first week in February.
Prices—Yearlings 2/6 each; two year olds, 3/6 each.
- CEYLON BLOOD.** Fruit medium to large size, flesh blood red and good, excellent for canning. April.
- GEORGE'S LATE CLING.** Large, white flesh, good bearer, carries well. Middle March.
- LEMON CLING.** The largest Clingstone, clear yellow, fine flavoured flesh, ripening in March.
- LIMA DE DOLORES.** Flesh white, blood red at stone, firm and well flavoured, skin creamy yellow, fruit very large, ripe end of February.
- PHILLIPS CLING.** A canning Peach of a very large size. The deep yellow firm flesh is of a superb quality.
- RED BIRD CLING.** Brilliant colour, large size fruit, flesh firm. December.
- SELLERS GOLDEN CLING.** Very large, orange yellow, salmon coloured cheek, one of the best canning sorts, late mid-season.
- TUSCAN CLING.** One of the best early clingstone peaches; ripens first week in January. A very large yellow fleshed variety; splendid for canning.
- VAN RENSBURG.** April to May. Very late, can remain on the tree more than a month after ripening. Yellow fleshed.
- WAINWRIGHT.** Large white fleshed clingstone, skin white with red on sunny side. A juicy and sweet fruit, good for canning, it ripens middle February.
- WHITE PARVIE.** Large late, an old well-known variety.

SUB-TROPICAL PEACHES.—SUB-TROPIESE PERSKES.

These varieties of Peaches are all very early, and command best prices on local markets. They do invariably well in the bushveld as well as in the coastal regions and in the Lowveld, where the European and American varieties of Peaches with few exceptions do not thrive. They are unsuitable to the South African Highveld except in very sheltered places, but do well on the tropical plains of Central Africa.

- ALEXANDER JEWEL.** One of the best sub-tropical peaches, early, very heavy cropper, large fruited.
- ANGEL.** Large, a good cropper, bears well in hot districts, early flowering December.
- BEAUTY OF BOORRODABIN.** Ripens end of October to first week in November. The earliest peach, very heavy bearer, large uniform sized fruit, has proved its reputation.
- EDWARD VII.** Whit flesh, a heavy cropper, good size, excellent flavour, ripe 10th of December.
- FLORIDA CRAWFORD.** Fruit identical with Crawford, but suitable for much warmer districts. Ripe Christmas. Usually heavy bearer.
- JEWEL.** Medium to large, highly coloured, excellent quality, first week in December.
- IMPROVED WALDO.** Early, medium sized fruit of best quality. Heavy bearer, ripe 10th of December.
- KILLIEKRANKIE.** Good size and quality. Ripe first week in November. An extremely heavy cropper, highly flavoured.
- OKLAHOMA QUEEN..** A splendid peach of good size and appearance. Early Does well in the lowveld and Highveld alike.

NECTARINES. — GLADDE PERSKES.**(On Peach Stock.)** Plant 20 x 20 feet apart.

(For Prices see Pages 2—3).

EARLY RIVERS. Largest and finest, very juicy and rich. December.**GOLD MINE.** Very large, half early, good, perfect freestone, productive, January.
Very good for export.**LEE'S SEEDLING.** Largest size, beautiful coloured, rich freestone, ripens mid-season.**RED ROMAN'S.** Very good, large, beautifully aromatic. January.**STANWICK.** Large, green in the shade, purple red where exposed to the sun, good late variety. Good shipper.**VICTORIA.** Fruit large, green skin being purplish red on sunny side, flesh white, melting and juicy. The latest of the Nectarines, ripens February.*BENONI,**29-8-38.**The Trees I purchased two months ago are doing wonderfully well.***APRICOTS. — APPELKOSE.**

Plant 20 x 20 feet apart.

(For Prices see Pages 2—3).

BULIDA. A new variety originated from Australia. The white fleshed fruit is slightly larger than Royal, it ripens in December. A good canning variety. This tree is a good grower and to all appearances will adapt itself well to our climatic condition. Yearling 3/6 each.**ALPHA.** Medium to large, the earliest, strong grower, ripe end of November.**BLENHEIM.** Vigorous and healthy, certain cropper, large, good for canning and drying. Mid-season, suitable for export.**EARLY NEWCASTLE.** A very early medium sized apricot of fine yellow colour, prolific, bears well in the Bushveld.**EARLY CAPE.** Very early, good size and quality, good bearer, good market variety, ripe first week in December.**MOORPARK.** Where suitable it is the finest and largest apricot, beginning of January. Good for the Bushveld. Good exporter.**OLD CAPE.** Early, selected strain of the best Wellington variety, mid-season.**ROYAL.** Medium size of good quality, the best commercial variety, heavy cropper. Excellent shipper. December.**TILTON.** Midseason to late, fruit medium to large in size, well coloured, a good bearer on the highveld.**ALMONDS. — AMANDELS.**

Plant 24 x 24 feet apart. For Windbreaks plant 12 x 12 feet.

(For Prices see Pages 2—3).

Almonds are one of the few fruits to which hail can do comparatively little harm. Easily picked and stored, they can be disposed of any convenient time, and will find a ready market.

They should be planted in alternate rows of each sort as they need thorough cross fertilisation. All our Almonds are worked on Peach Stocks, and are good drought resisters and will grow on gravelly soil.

BRITS. The most prolific Almond to grow. A wonderful sure and heavy cropper, very hardy, soft shell.

I.X.L. Strong upright growers, large, soft shell nuts.

JORDAN. The most important commercial variety with the largest and heaviest nuts.

MISSION PRINCESS. Very productive. This variety being a late bloomer, it succeeds well in the Highveld or in other places where late frosts occur.

NONPAREIL. Heavy, regular bearer, thin shelled.

PAPER SHELL. Very good, prolific, medium size variety with a soft shell. Good for cross polonizing the Brits.

WALNUTS. — OKKERNEUTE.

Plant 30 feet apart each way.

(For Prices see Pages 2—3).

Walnuts do best in deep soil, preferably a river bank. Once they are established they do not need any special care or artificial waterings. Remember, pruning to Walnuts is harmful to the trees and unnecessary.

ENGLISH. The well-known European variety.

BAIRNSDALE. An Australian variety of good quality. Bears young and is a strong grower.

MAMMOTH. A variety originating from the Cape nuts, of enormous size, being twice as large as the ordinary walnut. Yearlings, 2/6 each; 24/- per dozen. Two-year olds, 3/6 each; 30/- per dozen.

CHERRIES. — KERSE.

Price : 3/6 each, the following varieties are available :

May Duke.

Monstreuse de Mezel.

Giant Hedelfinger.

Early Rivers.

KIMBERLEY,

11-7-38.

Both the Trees and Strawberry plants arrived in good condition. I thank you for your promptness and care in packing.

JAPANESE PLUMS. — JAPANESE PRUIIME.

Worked on Peach Stock, some varieties on mirobolan.

Distance to plant apart, 20 x 20 feet.

(For Prices see Pages 2—3).

EARLY VARIETIES. — VROEË SOORTE.

BEAUTY. Fruit of good size and quality, good for export, ripens beginning November, the earliest Plum in existence. An early and regular bearer.

BURBANK. Large, round, beautiful bright crimson. Good for export. Ripe December. Abundant bearer.

FORMOSA. The largest of the early Plums, Ripens a few days before Santa Rosa. Good for export.

METHLEY. Medium sized round fruit, rich dark red, also flesh dark red, fine texture, melting and delicious, very early.

SANTA ROSA. Fruit deep purple crimson, stone small, rich flavour; ripens by the 20th December and keeps for 10 days. Abundant bearer and very good exporter. Strongly recommended, good Lowveld variety.

MIDSEASON VARIETIES. — MIDSEISOEN SOORTE.

ABUNDANCE. Fruit oblong, yellow and cherry-red, flesh orange yellow, heavy cropper.

ELDORADO. Flesh yellow, hard and firm. Fruit large, flattish, colour when ripe dead black, delicately flavoured.

HALES-GAVIOTA. Large size, beautiful appearance, regular bearer, ripens January. Forms a nicely shaped tree. Highly recommended. Export.

SATSUMA or BLOOD. Enormous cropper, very large, blood colour; firm; for canning. January. Does well anywhere.

WICKSON. Beautiful fruit, deep yellow, changing to deep carmine, keeps for two weeks and is considered the best of all Japs. January.

LATE VARIETIES. — LAAT SOORTE.

OCTOBER PURPLE. Yellow flesh, skin partly coloured red, good bearer.

ROYAL. Large and late Jap. Plum, deep carmine red all over.

KELSEY. Largest and latest heart shaped, clear yellow, carmine spotted, firm, very rich. Excellent for export and drying.

FRANCISTOWN,

4-1-39.

I am very proud to say that all the fruit trees are growing beautifully.

DOMESTIC PLUMS. — EUROPESE PRUIME.

Plant 20 feet apart.

(For Prices see Pages 2—3).

DIAMOND. Large black, flesh deep yellow, coarse grained, a good cooking plum. Heavy cropper. February.

GREENGAGE. Greenish yellow, medium size, tender, melting and sweet. February.

PRIDE OF ENGLAND. Medium to large, greenish yellow, very juicy, February—March.

HAHN'S D'ALMAGNE. Large dark purple, excellent flavour, good bearer, skin dark purple. January.

PRUNE D'AGEN. Medium size, juicy and sweet, good bearer, one of the best. Midseason to late.

THE CZAR. Large, blue, yellow fleshed. Early to mid-season.

QUINCES. — D. KWEPERS.

Quinces for Hedging—Our selection of varieties, 60/- per hundred, delivered railage paid.

Plant 16 x 16 feet, and for hedging 5 feet apart.

IMPROVED BORRIE. A yellow fruited variety, juicy and of good appearance, regular and heavy bearer.

ORANGE. Large round, golden yellow, excellent.

CAPE SELECTED. Grown largely in the Cape.

MEECHE'S PROLIFIC. Superior late, flesh orange yellow, fragrant.

PERSIAN. Large golden, heavy cropper.

PORTUGAL. Large, flesh yellow, juicy, fruit oblong.

RAE'S MAMMOTH. Very large and productive, keeps well, early

VAN DIEMAN. Medium to large, good bearer, oval shaped fruit.

FIGS. — VYE.

Plant 16 x 16 feet apart. For Hedges 5 feet apart.

(For Prices see Pages 2—3).

Figs for Hedging.—Our selection of varieties, £3 per hundred, delivered
railage paid.

ADAM. Heavy and regular bearer. Skin brownish, flesh red, of fine texture.

BRUNSWICK. A white fig of excellent quality, fruit very large pyriform.

BROWN TURKEY. Medium size, good quality and good bearer.

CAPRI. For fertilizing other varieties, where these fail to set.

CASTLE KENNEDY. Very large fig of good quality, good bearer and good
market fig, fruit brown, flesh pale stained red towards centre.

DE DALMATIE. Large green, oblong fruit excellently flavoured, flesh red, very
suitable for canning.

GROSSE VERTE. White fleshed, an excellent variety, extremely large.

MARQUIS LAUREROS. The largest brown fig, excellently flavoured.

MADELAINE. A fine textured medium to large fruit, excellently flavoured tree,
a fine bearer.

NEGRO LARGO. Red fleshed, large size pyriform shaped fruit. Black coloured.

OLD CAPE WHITE. A good variety, flesh yellowish brown, skin pale green.

SMYRNA. Large pink, rich flavoured fig, of light pear green colour, needs cross
fertilization with Capri.

TIGER. Large brown fruited, striped white, fine for canning whole.

WHITE ADRIATIC. Large green, flesh red, excellent flavour, hardy, robust and
prolific. One of the best, good for drying.

WHITE GENOA. Medium to large, white flesh and sweet, good bearer, skin
greenish brown.

WONDERFIG. A new variety, fruit large and early ripening in November. Tree
hardy and vigorous, and a very prolific bearer. 4/6 each, in tins.

NELSPRUIT,

12-4-37.

*The Peach and Apple trees you sent me have grown wonderfully and several
farmers have remarked on their growth.*

CITRUS TREES. — LEMOENBOME.

Plant 22 to 24 feet apart each way.

Our Citrus Trees are budded on the Cape Rough Lemon Stock and trained to a
single stem. Planting time: August to March.

(For prices see prices of Fruit Trees on Pages 2—3).

All varieties available in tins right through the season. From open ground
plant July to September and December to March.

GRAPE FRUIT.

TRIUMPH. Large fruit borne in clusters of three or four, nearly seedless. A good export variety. The best for the Transvaal.

MARSH'S SEEDLESS. Medium sized, early bearing, juicy and a good keeper.

POMPLEMOUSE. Large fruit with loose rind. Splendid for preserving

LEMONS. — SUURLEMOENE.

EUREKA. Nearly thornless tree, fruit of very high quality, can be recommended.

LISBON OR GENOA. Fruit long oval, thin and smooth skinned, juicy and one of the best lemons, a regular and abundant bearer, does well all over.

VILLA FRANCA. Fruit medium to large, pointed and oblong, with a thin and fragrant rind; pulp juicy and strongly acid; a few seeds; one of the finest lemons grown. Keeping well.

COMMON OR ROUGH SKIN. Old Cape variety, 1/- each; 10/- per dozen.

CITRON. The rind of this variety, when cured, is known as "Citrus Rind" or "Succade."

KUMQUATS.

NAGAMI KUMQUATS. The small plum shaped fruit makes delicious preserves.

MANDARINES and NAARTJIES.

BEAUTY OF GLEN RETREAT. Tree strong grower and productive, highly flavoured fruit which cannot be surpassed. Suitable for export.

CAPE NAARTJIE OR TANGARINE. Large fruit, loose rind and sweet flesh. Late and hangs well on tree. Excellent for local markets and export.

BOMBAY NAARTJIE. Large and flat fruit of good quality, loose skinned, prolific bearer.

EMPEROR MANDERIN. The largest kind, most profitable for market growing. Loose skin, good shipper an excellent variety.

OONSHU. Medium sized, oval shaped. Colour deeper yellow as other naartjies. Flesh tender and juicy, seedless. More frost resistant than any other variety of citrus.

AUSTRALIAN MANDARINE. Early, fruit thin skinned, rind loose. One of the best mandarines, and certainly the largest.

NATAL TIGHT SKIN. Colour deep orange yellow when ripe, well flavoured and juicy medium sized fruit, excellent shipper.

ORANGES. — SOETLEMOENE.

ABUNDANCE. A specially selected Transvaal Seedling Orange, the fruit has few pips, is of uniform size and thin skinned. The tree grows to a very large size, and produces fruit in abundance.

DU ROI. Fruit medium to large, sometimes very large, form slightly oblate, rind thin and pulp firm and juicy, few seeds, ripening late.

MEDITERRANEAN SWEET. Large, round, very juicy and sweet. Tree dwarf and thornless, most productive, successfully exported, mid-season to late.

NAVELENCIA. Closely related to the Navel Oranges, fruit good sized, smooth and thin skinned. Tree comes into bearing the second year.

PAPER RIND ST. MICHAEL. Thin skinned, smooth and very fine textured fruit of pale lemon colour, ripens mid-season. Of best shipping quality.

RUBY BLOOD. The best of the red-fleshed varieties, tree strong, good bearer ripens August to September.

SELECTED TRANSVAAL SEEDLINGS. A good variety of the celebrated Marico District Orange. The fruit is large and sweet and ripens in mid-season. Good shipping quality.

THOMPSON'S IMPROVED NAVEL. Resembling the Washington Navel in many respects. Good flavour, thin skin and comes early into bearing.

VALENTIA LATE. Tree a strong grower, fruit medium size, roundish-oval, pulp acid until fully ripe, colour very rich, few seeds, ripens late. Excellent for export.

WASHINGTON NAVEL. Fruit large, solid and heavy, skin smooth and of fine texture, highly flavoured and very juicy. Early ripening. Tree bears young. Good shipper

OUTJO,

15-2-37.

Die Lemoen bome wat ek gekry het, dra goed, en ek voel tevrede.

PECAN NUTS.

Plant 30 feet apart each way.

The future Nut for South Africa. The texture of the fruit is similar to a Walnut, with a more refined flavour, the shell being much thinner and softer, easily broken like that of a soft shell Almond. The tree is a fine grower and commences bearing at the age of five years. It thrives in the warmer parts of Africa and will do in sheltered situations on the Highveld.

PECAN SEEDLING TREES, 2/- to 3/- each in tins; 20/- to 30/- per dozen.

BUDDED PECAN NUT TREES. Of the Frotcher, Van Deman, Pabst and other thinshelled varieties, can be supplied at 10/6 per tree, from open ground for Winter delivery.

TUNG NUTS

A nut originating from Florida, where it is largely planted for the extractions of oil from its fruit, turpentine and oils for waterproof paints being extracted therefrom. The tree stands a fair amount of frost and is a rampant grower with a wide spreading crown and should be planted 30—35 feet apart. The nuts are not edible. Trees in tins 1/- each; 10/6 per dozen; 75/- hundred. Trees from open ground for Winter delivery, 7/6 per dozen; 50/- per hundred; single trees 9d, each.

GUAVAS. — KOEJAVEL.

Plant August—March. Plant 12 feet apart each way.

PRICES: In single tins, 1/3 each; 12/- per dozen; 80/- per hundred.

Larger size trees, 2/6 each; 25/- per dozen.

PARKER'S HYBRID. A pear shaped firm fruit Guava, large and aromatic.

RED CHINESE. More frost resisting as the other varieties; fine for jelly making. Plum shaped.

GUAVA "FIJI BEAUTY." A fine variety, producing a white fleshed firm fruit flavoured, and the tree being hardy should thrive in sheltered Highveld positions, 2/6 each in tins. Large size 3/6 each.

PERSIMMONS. — JAPANESE DADEL-PRUIME.

PRICES : Large size trees, 4/- each; 40/- per dozen.

Smaller size trees, 3/- each; 32/- per dozen.

GUIBOCHI. Olong, red fleshed fruit, of fine flavour and texture.

KINGCOT. Large aromatic fruit, good bearer.

LATE FLAT Very large, melting fruit.

MAZELLI. Late flat, large of high quality.

NITARU. Well coloured, flat shaped fruit, keeps well, late.

OKAWE. Medium sized, nearly round, flesh red and sugary.

TIDEMON. Large sugary fruit, early.

TIPO. Large fruit, possessing the colour and shape of an orange.

ZENDYI. Medium sized, nearly round, flesh red and sugary.

YEMON. Large oblong smooth fruit.

BRACKPAN,

25-1-37.

The Vines I had from you in July are coming on fine.

GRAPE VINES. — DRUIWESTOKKE.

The following is a list of the **newer varieties**, which we can confidently recommend for trial planting.

Trial Collection of the seven following varieties of Grape Vines, one plant of each 12/- for yearlings; 18/- for two-year olds. Post free.

ALPHONSE LAVALLE. Large blackish blue berries sweet and aromatic. Midseason. Yearlings 2/- each; two-year old 3/- each.

CHATEAU.—Clear wine red colour, berries large and full, ripening early. Yearling 2/- each; two-year old 3/- each.

FERDINAND DE GESSEPS. A new midseason variety. Yearlings 2/-; two-year olds 3/- each.

GOLDEN QUEEN. A white grape, ripening to golden yellow. Yearlings 2/-; two-year olds 3/- each.

MARGARETHA—T. Blue-black, of oval shape in long bunches, 2/- each; two-year olds 3/- each.

CHASSE LAS ROGUE-Roter Gutedil. A fine grape, when fully matured the berries are red. Yearlings, 2/-; two-year olds 3/- each.

SHAVOAH. T. A very early variety. Yearlings 2/-; two-year olds 3/- each.

GENERAL LIST OF OLDER VARIETIES OF VINES.

	Each.	Per dozen	Per hundred
PRICES : Yearlings	-/9	7/6	45/-
Two-year olds	1/3	12/-	65/-
Three-year olds	2/6	25/-	

Railage prepaid per dozen and per hundred.

Special quotations for large quantities.

All our vines are sent out ready pruned for planting.

For varieties not listed below, please enquire, as we have several other varieties in stock. Varieties suitable for trellis are marked T.

EARLY VARIETIES. — VROEE SOORTE.

BLACK ACORN. T. Dark red berries, ripens early, an old favourite.

BLACK MANUKA. A seedless variety, very large bunches, of good sized berries, early

BLACK CURRENT. Ripens early, the current grape.

BLACK PRINCE. One of the best earlies, black berries, free bearer.

GROS COLEMAN. T. Jet Black, immense size. A good early.

RED MUSCADEL. T. Fine flavour, one of the earliest.

RED CRYSTAL. T. Early, beautiful clear grape, large handsome bunches.

WHITE CRYSTAL. T. Good white table grape, hangs late. Second early.

WHITE MUSCADEL. A large early and well flavoured grape, slow grower.

MIDSEASON VARIETIES. — MIDSEISOEN SOORTE.

BARBAROSSA. T. Immense cropper, large bunches, black. Mid-season.

CARNICHON. T. Beauty and quality are combined, the berries are of large oblong shape, the colour is purple with a beautiful bloom

CATAWRA or STRAWBERRY GRAPE. T. Musk flavour, heavy cropper.

HERMITAGE. Perfectly flavoured black grape, good bearer, mid-season.

MUSCAT HAMBRO. Many consider this grape the best flavoured. The bunches are loose and the berries very juicy.

SABALANSKY. Berries oval, white, slightly pinkish, mid-season.

SULTANA. A seedless berry, the real raisin grape.

WALTHAM CROSS. T. Large bunches and large oblong berries. Mid-season.

WHITE FRENCH (Fraans Druive). T. Large, loose bunches, berries of medium size, sweet, soft and juicy.

LATE VARIETIES. — LAAT SOORTE.

ALMERIA. White export grape, best keeper, very late.

FLAMING TOKAY. T. Large loose bunches, red oblong berries, tough skinned. Late.

LATE DAMASCUS. T. Large firm bunches of round black berries.

RAISIN BLANC. A fine white late grape, large showy bunches.

RED HANEPOT. T. Large berries, fine flavour, late, very popular variety.

WHITE HANEPOT. T. Large and rich yellow grape. Late.

KIMBERLEY,

11-7-38.

Both the Trees and Strawberry plants arrived in good condition. I thank you for your promptness and care of packing.

BERRY FRUIT. — BESSIES.

AMERICAN MAMMOTH BLACK BERRY. 1/- each, 8/- doz., 50/- per 100.

CALIFORNIAN LOGAN BERRIES, 1/- each; 10/- per dozen; £3-5-0 per 100.

CUSTARD APPLE. In single tins, 2/6 each.

GRENADILLA—GROENE GAGIE—

Large fruited, 1/6 each in tins; 15/- per dozen.

Perfecta. The largest fruited variety known, rather a shy bearer, in tins, 2/- each.

Everbearing Giant. An excellent strain, 1/6 each in tins.

HAZEL NUTS. The Filbert. Large fruited, 2/6 each in tins, 25/- per dozen.

POMEGRANATES—Granate. Fruit of immense size, also suitable for hedging. 6d. each; 5/- per dozen; 30/- per hundred. Two-year olds, 1/- each; 10/- per dozen; 60/- per hundred.

RASPBERRY—FRAMBOOS—

Superlative. Large, very aromatic, red fruit, 1/- each; 8/- per dozen; 40/- per hundred.

Everbearing, 1/6 each; 15/- per dozen.

JAPANESE ROSE APPLES. (Rosa Rugosa). The fruit attains a diameter of 2—3 inches, especially useful for canning and picking, 1/6 each.

We have two varieties in stock, the scarlet and the white.

STRAWBERRIES. — AARBEIE.

The Plants offered are well-rooted Selected Runners.

Prices include free delivery by post within the Union.

Strawberries are without doubt the most profitable of all berries. The plants are set 2 feet 6 inches apart on deeply dug and well prepared soil. On very hot parts they are advantageously planted in semi shade, thereby preventing the fruit becoming sunburnt. Old Cow or Stable manure is best to use. Planting time from March to September.

AMERICAN EVERBEARING. Robust grower, large and firm fruit; exceptionally productive, practically everbearing in frost free localities. Per dozen 1/6, per hundred 7/6; per thousand, 55/-.

AURIE. Fine large aromatic fruit, 1/6 per dozen; 8/- per hundred; 60/- per thousand.

EARLY BEAUTY. Fruit medium to large size, flesh firm juicy and sweet. Prolific bearer. 1/9 per dozen; 8/6 per hundred; 55/- per thousand.

LAXTON'S NOBLE. The main crop variety, large fruited and heavy bearing strain. 1/6 per dozen; 7/- per hundred; 40/- per thousand.

MATHILDE. Midseason to Late, fruit large egg shaped, colour light red, flesh rose coloured; firm and aromatic. 1/9 per dozen, 8/6 per hundred.

MISSION MARVEL. Very large, dark red, fine flavoured berries, flesh firm, the ripe fruit carries well. 1/6 per dozen; 7/6 per hundred; 55/- per thousand.

OBERSCHLESIEIEN. Late light red, very large and prolific bearing, its size bearing habit and delicious flavour makes it one of the favourites. 1/6 per dozen; 8/- per hundred; 60/- per thousand.

RHODES EVERBEARING. A fine everbearing variety, fruit a fair average size, of fine flavour. The plant is a exceptionally heavy bearer. 1/6 per dozen; 7/6 per hundred; 55/- per thousand.

WHITE HEART. Fine large wedge shaped aromatic fruit. Per dozen, 1/6, per hundred, 8/-; per thousand, 55/-.

ROYAL SOVEREIGN. Large to very large vivid coloured red fruit, very aromatic, 1/6 per dozen; 7/6 per hundred; 45/- per thousand.

DRY HARTS, C.P.,

3-1-39.

Trees safely received. They are strong healthy trees and I am very well satisfied.

Miscellaneous Fruit Tress — Diverse Vrugtebome.

AVOCADO PEARS. Seedling trees. Varieties available. **Large Green Milka, Pearmain, Rasset, Calabash.** Prices : 3/6 and 4/6 each; $\frac{1}{2}$ dozen trees 20/- and 25/-, all established in tins.

BANANA TREES. Only suitable for frost free localities. Varieties available **Natal Dwarf, Ducasses Hybrid, Ladies Finger,** Prices for trees established in single tins, large size : 3/- each; 24/- per dozen.

LITCHIES. Trees established singly in tins, 7/6 each; six trees 42/6.

LOQUAT, BAXTER'S GIANT. This variety will start to bear 3—4 years after planting, the fruit is extremely large and the tree a prolific bearer. Loquats do well in South Africa, stand the highveld climate unprotected, and the fruit being so much appreciated, they should be more generally planted. Strong seedling trees in tins, 3/- each; 30/- per dozen, f.o.r. Marico.

LARGE FRUITED LOQUAT. A stately evergreen fruit tree, good for avenues or as a shade tree. In single tins, 1/- each; 10/- per dozen; 75/- per hundred.

MANGO TREES. Sabre, Peach and Kidney varieties stocked. Seedling plants established in tins at 3/6 to 4/6 each; 20/- and 25/- per $\frac{1}{2}$ dozen. To be planted in frost free localities only.

MULBERRIES. Grafted plants, the **Large Black** or **Cape** and the **Persina Large Black** are the only two varieties which carry large plumb deep black fruit. Two-year old trees, 3/- each; 30/- per dozen. Yearlings, 2/6 each; 35/- per dozen. Smaller sized trees, 2/- each; 20/- dozen.

QUEENSLAND MULBERRY, makes a fine shade tree, specially suited for avenues, fruit medium sized, 1/3 each; 12/- per dozen; 80/- per hundred. **Red small fruited** (*morus nigra*) Grown from cuttings, 1/- each; 10/- per dozen. Good for planting avenues or as shade trees, quick growing. **Silkworm Mulberry** (*morus alba*). Unrooted cuttings, 4/- per hundred; 25/- per thousand.

MEDLARS MISPEL. Giant fruited Cape, 2/6 each; in tins, 3/6 each.

OLIVE TREES—Varieties available.

For Oil production : **Lucca, Late Blanguette and Leccino.**

For Picking : **Ascaion and Spanish Queen.**

Trees established in 4 gallon tins, 5/- each.

PAW PAWS. Large fruited, in tins, 1/- each; 7/6 per dozen.

TRANVAAL YELLOW PEACH SEEDLINGS. Strong trees, 9d. each; 7/6 per dozen; 50/- per hundred. Carriage paid per dozen and per hundred

TREE TOMATO. Established in single tins, 2/6 each.

RHUBARB AND ASPARAGUS ROOTS.

Plant May to August.

NEW CRIMSON WINTER, 1/- each; 10/- per dozen. Post free.

MYATT'S VICTORIA. 9d. each; 7/6 per dozen, post free, 50/- per hundred. Carriage paid.

RHUBARB SEEDLINGS. Six months old plants, 3/6 per dozen, post free.

ASPARAGUS ROOTS. One year old, 2/6 per dozen, post free.

ROSES.

A FEW WORDS ON THEIR CULTURE.

Should it be found that, on arrival, the plants are not looking quite fresh owing to delay in transit, they should be immediately submerged in fresh, flowing water, or laid in a trench and covered to their full length with soil, well soaked and left to remain there for twenty-four to forty-eight hours, when they will be found to have quite revived.

Planting.—Roses grow best in sandy soil or rather stiff nature which does not contain too much vegetable matter. They do not like brackish or stagnant soils nor do they thrive well in confined positions. As the yare gross feeders, the ground may have a good quantity of manure—cow manure is the best—dug into it. Great care, however, must be taken in planting that no manure be brought in contact with the roots; this is often the cause of unsatisfactory progress, even of well-established plants; the surface, however, should always be kept loose and mulched. All grafted roses should be planted deep enough to cover union of stock and graft two to three inches with soil. This will induce the grafted-on variety to form roots as well, thus the plants become doubly rooted, stronger and more drought resistant. After pressing the soil firmly to the roots a liberal supply of water must be given and this watering must be continued in order to keep the soil really moist during hot dry weather, a mere sprinkling of the surface will not do.

Shading.—Roses planted during warm weather August—September and January—February, are best shaded to prevent the sun drying out the growth and at the same time to keep the soil cool and moist. This is best done by placing a handful of straw, grass or suchlike over and around each plant; this can be removed as soon as the plants start sprouting. If possible, remove, during a cloudy cool day. The above applies only to rose trees planted out of the open ground; roses out of tins do not need any shading.

Pruning.—In planting, roses should be pruned very severely—all the growth reduced to one or two shoots, and these cut back as to have only a few eyes above the ground, according to variety. In planting as well as in later years, it may be observed that as a rule all weaker growing varieties must be cut short, in order to produce only few but strong growths. Robust growing sorts, Climbers, etc., should, in after years, be only very little cut back. Spring blooming varieties, like the Banksian, Singles, etc., should be severely pruned after having finished flowering, to encourage young growth—only old and surplus wood being removed in winter.

NEW ROSES 1939 NOVELTIES. Price: 7/6 each.

DICKSON'S BOUQUET (H.T.) An intermingling of salmon, carmine, and apricot, blended with saffron. Flower medium size, full and very lasting. Excellent growth, with long, wiry, upright stems, flowering in great profusion. Bouquet is further enchanted by its sweet scent, and will charm all who grow it.

DICKSON'S DELIGHT. (H.T.) Vivid Orange, heavily shaded scarlet orange in the bud. Pleasantly scented, moderate sized bloom. Good free, erect growth. Blooms late into the Autumn. A striking novelty of the most brilliant orange colour yet seen in roses.

FRIENDSHIP (H.T.) Bright strawberry red with a brilliant scarlet undertone. Moderately full, with very large, solid petals and delightful form. Magnificent growth, and extremely prolific. Pronounced true old rose scent. This bright fragrant rose is produced in great masses, and will have a strong appeal.

NEW ROSES. — NUWE ROSE.

PRICE: 5/- each. (Collection of 12 plants, one of each variety, 50/-. Post free.

AMPERE (H.T.) (Meilland). A very attractive bicolour. Capucine red on the inside, paler towards the edges, the reverse is orange yellow, coloured with carmine. The bloom is very large and double, deliciously fragrant, cupshaped and very lasting. Stands up to hot weather conditions well. Very favourably received by the experts. Gold Medal, Saverne, 1937. First certificate, Lyon, 1937.

CHARLOTTE E. VAN DEDEM (H.T.) (Buisman). Yellow, sweetly scented, vigorous growth, each bloom is carried on a long strong stem. Award of Merit.

COMTESSE ANNE DE BRUCE. (Mallerin). Bud soft salmon pink, the colour of the flower developing to a deep coralorange. The bud is beautifully shaped, and the flower of elegant form loosely built. Growth and habit excellent. A very beautiful variety.

GLOAMING. (H.T.) (J. H. Nicolas)—The general tone is salmon overcast with tawny orange and gold at the base and reverse of the petals. Its buds are carried on rigid stems, bloom is very large, double and fragrant. A strong robust growing and long lived plant. Gloaming has been well tested and can be thoroughly relied on.

GOLDEN PERFECTION. (Hyb. Poly) (M. Leenders). Golden yellow. Flowers large, full and fragrant. Growth strong, compact and bushy. Continually in bloom.

HOME SWEET HOME (H.T.) (Wood & Ingram). Pure rich velvety pink, with plenty of life, yet a softness very pleasing in effect. The colour lasts well. It is very perpetual flowering, has large, bold, dark green glossy foliage and a good constitution. A fine new rose which is distinct from any other in cultivation. Very highly recommended.

LADY CAHN (Gaujard). Is an excellent rose for the garden and for cutting. The flowers are of a beautiful long form of rich apricot yellow with dark veining, and the habit of the plant strongly resembles Comtesse Vandal. The stems are strong, vigorous, and upright, well clothed with good foliage, but more graceful and less stiff than those of the older variety.

LEMANIA (H.T.) (Heigman). Red with a blackish velvet sheen, exterior very deep red. The flower is very large and full, of superb form, and of the greatest elegance. The bud is very dark, giving the impression of a black rose. This superb variety will be greatly appreciated by reason of its charm and novelty. Gold Medal Saverne.

LISLE PALAIS (Gaujard). The pink and gold colouring is delicate, yet warm and clear. The growth is graceful, although strong and branching. The large full flowers last exceptionally well on the plant and in water. A novelty of great charm and merit.

ORANGE TRIUMPH (Hyb. Poly). (W. Kordes). A true seedling, best described as a dwarf growing Paul's Scarlet with a distinct orange shading. A great future is predicted for this rose. It is a highly attractive hybrid polyantha Rose. Gold Medal. N.R.S.

PRINCESE AMEDEV DE BROGLIE (Mallerin). A unique colour, glowing red with a yellow reverse of the petals. Beautiful even growth. An excellent rose for any purpose. Very highly praised by all who have seen it. Awarded "The most Beautiful Rose of France, 1935." Gold Medal, Begatelle.

VAINQUEUR (H.T.) (E. Heismann). The flower is dark blood red, very large and full, very sweetly scented. The bud is of a beautiful form carried singly on long erect stems. The growth is very strong with splendid foliage which harmonises with the large blooms. For its undoubted qualities this variety is strongly recommended for bedding, but is also excellent for cut flower and forcing. A red rose of the greatest merit. Awarded "The City of Saverne Cup."

VILLE DE SAVERNE (E. Heizmann). A great improvement on Heinrich Wendland. Vermillion-red shaded velvety maroon, and yellow, quite a new colour in roses. It has all the good qualities of Heinrich Wendland. An extremely promising and attractive variety.

SALISBURY.

20-6-38.

The Roses are growing fine, every one of them.

GENERAL LIST OF ROSES.

Dwarf or Bush Roses, from open ground. (Plant June to September and January to March).

OUR PRICES :

Customer's Selection of varieties :—

 2/6 each; per dozen of 12 varieties, 25/- f.o.r. Marico. Customers' selection, $\frac{1}{2}$ dozen, 13/6.

Varieties marked with an (*) are available in single tins deliverable right through the year. We can deliver the Bush Roses in tins to any Station within the Union or Bechuanaland Protectorate, against an extra 2/6 per dozen. Railage paid.

How to select.—Unless you have actually seen the Rose in bloom, catalogues do not fully describe them, therefore it is much better to state colour, growth etc., and leave the selection to us. You will generally get a better selection, as we have the experience to work on. During hot weather some varieties show a tendency to bleach their colour, thus appearing lighter than they really are, so a rose should not be condemned on its first flowering.

Please Note.—As the season advances some varieties will become sold out. We suggest that customers making their own selection should name a few supplementary varieties as substitutes in case of any sort of their first selection be sold out. If no substitutes is desired, write "No Substitutes" on the order, and we shall then fill the order only so far as we have plants of the varieties ordered in stock.

Booking Orders.—To prevent disappointment we advise all orders be sent to us as early in the season as possible, so that the plants can be booked and reserved for delivery at the most suitable time.

Abbreviations.—H.P., Hybrid perpetual; T., tea; B., Bourbon; H.T., hybrid tea; C., China; C.L.B., climbing; P. polyantha; N., noisette; Dwf. P., dwarf polyantha; W., Winchuriana; Pernt. Pernetiana.

Varieties marked "S," are available as **Standards** established in 4 gallon tins.

Varieties marked with an Asterisk (*) are available as **Dwarf of Bush Roses**, established in 1 gallon tins.

SCARLET, DARK RED, CRIMSON and CARMINE SHADES.

ADVOCATE. (H.T.) Rich crimson red, deeply veined and shaded darker crimson. A free and perpetual bloomer.

- MARIANNE** (H.T.) Colour a mixture of coppery orange, pink and red, bloom large of fine form and high pointed centre. Sweetly scented.
- MAX KRAUSE** (H.T.) Reddish orange, changing to lighter tone as bloom opens. Strong erect growth.
- ***S. MERVROUW G. A. ROSSEM**. (H.T.) Heavily flamed and shaded dark orange and apricot on a dark golden yellow ground, the reverse of the petals is dark bronze, wonderfully perfumed. Two Gold Medals.
- MRS. AMY HAMMOND**. (H.T.) Very floriferous, colour apricot.
- MRS. DUDLEY CROSS**. (T.) Pale chamois yellow passing to crimson, large, full, long pointed buds.
- MRS. FRED STARKER**. (H.T.) Orange crimson, silvery fawn and orange pink as flowers develop.
- MRS. MONA HUNTING**. (H.T.) Reddish chamois-yellow, opening to pure fawn; lovely, long-pointed bud; very distinct and fine.
- MRS. T. N. DOXFORD**. (H.T.) Old rose, heavily marked strawberry red; inside salmon carmine with yellow base, sweetly scented.
- MRS. WALLACE H. ROWE**. (H.T.) Bright sweet-pea, mauve, of largest size, very full and fine substance.
- ODETTE FOUSSIER** (H.T.) Disease resisting, superb long bud, colour bright rosy salmon, inside of petals of chrome, very fragrant.
- QUEEN MARY**. (H.T.) Lemon chrome, bordered deep carmine, scented.
- REIMS**. (Pernt.) Outside of petals flesh pink; inside bright nankin yellow, apricot orange and coppery pink; long pointed bud.
- REVEIL DIJONNAIS**. (Pernt.) The interior of petals is suffused cerise on dark golden yellow, the exterior yellow edged carmine.
- SOUV. DE GEORGES PERNET** (H.A.B.) Colour beautiful red, shaded yellow, large, full and globular blooms.
- * **SOUVENIR DE HENRY FAASSEN**. (H.T.) Free flowering and beautifully formed. Colour striking rose wit horange base. Gold Medal.
- SOUVENIR DE H. A. VERSCHEUREN**. (H.T.) Colour cadmium yellow, buds long and pointed and very sweetly perfumed. 2 Gold Medals.
- SOUVENIR DE MADAME LOUISE CRETTE**. (Pernt.) Bud yellow carmine, flower golden yellow, shaded coral and tinted red.
- SOUVENIR OF STELLA GREY**. (T.) Deep orange with splashes of yellow, apricot, salmon and crimson, beautiful and unique colouring.
- SUNSTAR** (H.T.) Bright orange, edged and veined vermilion.
- ***S. TALISMAN**. (H.T.) The highest coloured roses yet raised, rich shadings and blendings of pure scarlet and gold. Its free blooming habit, stiff stems and cup-shaped buds make it a marvel.
- ***S. WILLIAM KORDES**. Coppery yellow, flushed and veined carmine, remarkably fine rose, highly fragrant.

DWARF POLYANTHA ROSES.

These are most profuse and continuous bloomers, the small exquisite and double flowers being highly perfumed. They are delightful for massing in beds or as hedges, for beds of taller growing roses. The blooms are borne in clusters.

BRITANIA. Rich crimson with white centre, very effective.

CATHERINE ZEIMET. Pure white very floriferous.

DIANA. Dark orange suffused with carmine.

EBLOUISSANT. A splendid deep crimson bedder, an unique colour.

ERNA TESCHENDORF. Dark crimson. Very fine.

EUGENIE LAMESCH. Buds ochre yellow, flowers pink, highly perfumed.

FIREBALL. Reddish orange. Continuously blooming

GEORGE ELGERS. Coppery golden yellow changing to clear yellow.

GLORIA MUNDI. Colour glowing orange, outstanding in every way. Awarded 4 Gold Medals.

JEANNE D'ARC. Pure milky white, beautiful.

LEONIE LAMESCH. Bright coppery red.

MAMAN N. LEVANASEUR. Rosy crimson.

MAMAN TURBAT. Clear china rose.

MARTHA KELLER. Pcelain white, edged lilac pink.

MERVEILLES DES ROUGES. Brilliant velvety crimson.

MRS. WM. CUTHBUSH. Deep clear pink.

ORLEANS. Bright cherry red, large and full.

PERLE D'OR. Nankeen yellow orange centre, fine.

PHYLLIS. Brilliant carmine pink.

PINK DELIGHT. Fine rose pink, single, large.

RODHAETTE. Brilliant cherry red.

RUFUS. Pure crimson without any shading, flowers produced in handsome corymbs.

VERDUN. Bright carmine purple, very effective.

YVONNE RABIER. Pure white, sulphur centre.

CLIMBING ROSES.

The following varieties are Climbing Sports of well known Garden Roses, and also include the Noisette type, all being large flowering varieties. They are not of such rampant growth as the Rambler and Winchuriana class, and are very suitable for covering fences, pillars and verandah trellis.

BEAUTY OF GLAZENWOOD. (Fortunes Sellow). (N.) Yellow flaked carmine, a very charming colour and very pretty bud, semi-double.

* **S. BLAZE.** The marvellous hardy everblooming climbing rose, producing an abundance of vivid coloured blooms throughout the season.

BUFF MARECHAL NIEL. (N.) Yellow, tipped peach in bud form, opening with buff centre, large and very full.

CAROLINE TESTOUT. Climbing sport of Caroline Testout.

* **CHAPLIN'S CRIMSON GLOW** Deep crimson with white base.

* **CLOTH OF GOLD.** (N.) Large and full, of perfect shape, yellow with deep golden centre. One of the best climbers.

* **DEVONIENSIS** (T.) Creamy white, centre blush, beautiful climber.

FEU D'ARTIFICE. (Climbing H.T.) (C. Mallerin). Colour coral red tinted capucine yellow of radiating brightness; flowers are fairly large. Gold Medal Saverne 1934.

FRAU K. DRUSCHKI. (H.P.) A climbing sport of Frau K. Druschki.

GLOIRE DE DIJON. (H.T.) Climbing buff, orange centre, large and full, a well-known variety.

GOLDEN DREAM (H.T.) Deep Golden Yellow.

- * **GROSSHERZOG ERNST LUDWIG.** (H.T.) The red Marchal Niel.
- IRISH FIREFLAME** (H.T.) In all respects, excepting growth, identical with the normal type, from which it is a sport.
- LA FRANCE.** Good climber, flowers the same as of the parent variety.
- LAMARQUE.** (N.) Creamy white, the parent of Marchal Niel.
- LIBERTY.** (H.T.) Bright velvety crimson, climbing.
- LYON ROSE** (H.T.) Colour variable shrimp pink with coral red flowers.
- * **S. MARECHAL NIEL.** (N.) Rich golden yellow, fragrant.
- MADAME BERARD.** (T.) Salmon rose, shaded yellow, large full and good shape, sweetly scented. Climber.
- MADAME JULES GRAVERAUX.** (T.) Buff shaded rose, very floriferous.
- MERMAID.** (H.B.) Sulphur yellow, large flowering climbing rose, single.
- MRS. STEWART CLARK** (H.T.) Bright cerise pink to rose pink.
- * **S. NEW DAWN.** Colour a soft alabaster pink, blooms double resembling a hybrid tea, of delightful fragrance. Perpetual blooming.
- PAUL'S SCARLET CLIMBER.** Deep brilliant crimson, continuously blooming.
- PAUL'S LEMON PILLAR.** Light yellow, blooms produced singly.
- * **REINE MARIE HENRIETTE** (H.T.) Cherry red, very striking, splendid buds.
- ROSABEL WALKER.** (H.T.) Brilliant scarlet shaded velvety crimson.
- REVE d'OR.** (M.) Deep yellow, vigorous. Climber.
- SACHSENGRUSS.** (H.T.) Blooms of large size, scarlet rose, a good Climber
- * **SHOT SILK.** Cerise overshot, salmon orange.
- SOLEIL D'ORIENT** (H.T.) (J. Croiber Fils). Colour yellow shaded Indian red. The base of the petals are of a beautiful golden yellow. The perfume is very agreeable. Gold Medal at the Horticultural Society of Lyons 1935.
- WHITE MAMAN COCHET.** (H.T.). Extra strong climbing sport.
- WILLIAM ALLAN RICHARDSON.** (N.) Deep orange yellow edged white.

CLIMBING ROSES (Rambler Type).

- * **AGLALA.** Bright golden yellow, rosette shaped flowers, sweetly perfumed.
- AMERICAN PILLAR.** (W.) Colour a chaste shade of pink.
- * **BANKSIAN YELLOW.** Large clusters, thornless, colour deep yellow.
- * **BANKSIAN WHITE.** Clusters of white flowers, vigorous and free.
- BEAUTY OF WALTHAM** (S.) Cherry crimson, large and perfect.
- CRIMSON RAMBLER.** (W.) Deep crimson, double.
- DOROTHY PERKINS.** (W.) Bunches of bright pink flowers. Beautiful.
- EMILY GRAY.** Great substance and very glossy, leaves, rich yellow, large.
- GOLDFINCH.** Deep golden yellow.
- GRUSS AN ZABERN.** Pure white fine.
- * **HIAWATHA.** Single bright red with white centre, large clusters
- LEUCHSTERN.** (R.) Corymbs of single flowers, bright pink with white eye.
- MADAME D'ARBLAY.** (Rambler). Delicate flesh changing to white, double.
- MRS. F. W. FLIGHT.** (W.) Deep pink.
- SODENIA.** Brilliant rosy red.
- * **TAUSENDSCHOEN.** (M.R.) Rose pink, semi-double rosette flowers, very fine, dense foliage.
- VEILCHENBLAU.** (R.) Reddish lilac changing to amethyst and steel blue, most distinct.
- * **WHITE DOROTHY.** (W.) White Sport of Dorothy Perkins.

WINBURG,

4-8-38.

Die Rose, Palms en Struik wat ek van U georder het is ek baie tevrede mee—selfs die verpakking ook.

PALMS. — PALMPLANTE.

Palms are of the most charming and graceful plants, their stately beauty increase year by year, as the Phoenix rises from the ashes, so a properly treated palm will show its majestic regal or drooping fons to perfection as the years go by. For decorative and ornamental effects, these plants are unexcelled, they can either be kept in tubs for indoors, or for outdoor growing. Planted as a *solitaire* on the lawn or set in groups in front of shrubberies, makes them universal favourites.

CHAMAEROPS EXCELSA. A hardy fan palm for outdoor planting or veranda decorations. Stands Highveld climate unprotected. 1/6 and 7/6 each.

COCOS PLUMOSA. A quick growing specie, will stand outdoors in sheltered spots in the Middleveld. A fine indoor variety 1/6 and 2/6 each.

DRACAENA INDIVISA. (CORDYLIN). A palm like plant, very hardy, thin narrow leaves. 1/6, 2/6 and 3/6 each.

CORYPHA AUSTRALIS. A large leaved fan palm, stands the Highveld climate in protected places. As it gains height slowly and possesses large decorative fans, it makes a highly desirable variety for stoep decoration. 1/6 and 2/6 each.

KENTIA BELMOREANA. A good indoor variety, tender, gracefully spread upright fans. 2/6 to 3/6 each.

LATANA BORBONICA. The house palm par excellence, slightly drooping fan-shaped leaves, forming a wellbuilt plant of great merit. 1/6 to 7/6 each.

PHOENIX RECLINATA. One of the hardest palms, stands Highveld climate, Its slender and gracefully arched foliage make it one of the most planted species. Splendid for veranda decoration. 1/6, 2/6 and 4/- each.

PHOENIX CANARIENSIS. A hardy palm, grows to a large tree. 1/6, 2/6 and 3/6 each.

PHOENIX TENUIS. Not so hardy as the former, but its fine leaved and graceful foliage makes it a good house or stoep palm. 1/6, 2/6 and 3/6 each.

WASHINGTONIA ROBUSTA. Fans of enormous size, measuring 3 feet and more in diameter on older plants. The deeply lacerated leaves are covered with long filaments. One of the best garden palms, also suitable for large stoeps. 1/6 and 7/6 each.

COLLECTIONS: Sets of 3 Palms for verandas, 4/6 to 20/- for 3.

Sets of 3 Palms for outdoor, 4/6 to 20/- for the three.

CLIMBING PLANTS. — RANKPLANTE.

All established in single tins.

ARISTOLOCHIA SIPHO. Dutchman's Pipe. A hardy climber with large glossy leaves, evergreen, suitable for covering garden houses. 1/6 each.

BIGNONIA. Autumn and winter blooming climbing plants. They require a sheltered place, preferably the north side of a building.

VENUSTA. The glorious *golden shower*, producing masses of golden orange flowers, in late autumn and winter. One of the best climbers, evergreen. 1/6 and 2/6 each, 15/- and 25/- dozen. Fairly hardy.

MCKENNIE. Pale pink flowers, borne in clusters, 2/- each.

RADICANS. Bright red blooms. Excellent 1/6 each.

JASMINOIDES. White crimson throated and spotted flowers, a fine glossy foliage, evergreen. 1/6 and 2/6 each.

THUNBERGII. Orange red trusses, deciduous and hardy, 2/6 each.

BEAUMONTIA GRANDIFLORA. A dark green, large leaved climber. The flowers are of large size and trumpet shaped. The plant is quick growing, evergreen and fairly hardy, 1/6 each.

BOUSSINGAULTIA—Maderia Vine. White fragrant flowers, beautiful shiny rich green leaves are covering vines, which grow up to 10 feet in one season, a marvellous quick grower, 1/- each, 10/- per dozen.

BOUGAINVILLEA. The most beautiful climbers, subject to frost, require very sheltered position on the Highveld, evergreen.

CYPHERIL. Bluish purple, a fine and profuse bloomer, 1/6, 2/6 and 5/- each. The most hardy of all the Bougainvilleas.

SANDERIANA MAGENTA. Practically ever-blooming. One of the best 1/6 and 2/6 each. Hardy.

BRAZILENSIS. Brick red, a striking colour, not so hardy as the blue varieties 3/6 each.

ROSE COLOURED. Beautiful old rose, tender to frost, 2/6 and 3/6 each.

DAME CLARA BUTT. A new variety, splendid blooms of a deep armine red shade. A magnificent plant 4/- each.

CLERODENDRON BALFOURI. Bright crimson flowers, enveloped to creamy white calyx, very pretty. For warm climates only. 1/6 each.

GRENADILLA. Strong growing evergreen climbers, hardy in sheltered places on the Highveld.

AUSTRALIAN BANANA. A banana-shaped yellow fruit, 1/6 each.

PERFECTA. Giant fruited, but rather shy bearer, 2/- each.

EVERBEARING. A large fruited variety, fruiting abundantly, 15/- per dozen, 1/6 each.

HONEYSUCKLE. Hardy and vigorous growing climbers.

AUREUM. Yellow, practically evergreen, 1/6 each.

FUCHSIODES. Red fuchsia-like flowers 1/6 and 2/6 each.

PINK. Large flowers of a deep pink shade, 1/6 and 2/6 each.

TELLMANIA. A new variety, trusses of large and most beautiful golden yellow flowers, 2/6 each.

IVY. English (*hedera helix*). Does well, but requires a cool and shady position. Evergreen 1/6 each.

JAPANESE KUDZU VINE. A quick growing purple flowered hardy climber, 1/6 each.

MANEVILLEA SUAVOLENS. One of the finest hardy climbers, quick growing. Sweetly scented jasmin shaped flowers. 1/6 each.

ROSE CLIMBERS. Large flowering and cluster type 2/- each; 20/- per dozen. In assorted varieties.

PETREA VOLUBILIS. A fine Climber. large panicles of beautiful violet blue flowers, 2/- each. Fairly hardy.

STEPHANOIDES. Wax flower, a good climber. Not hardy to frost. Lancinated yellow flowers. 1/6 each.

SHELL CREEPERS. Hardy, purple shell like blooms. 1/6 each.

SOLANUM WENDLANDII. Evergreen, producing large trusses of lavender coloured flowers practically throughout the year, 1/6 each.

SOLANUM SEAFORTHIANUM. Clusters of reddish lilac to dark blue flowers. lacinated foliage, robust grower, hardy, 1/6 each.

POLYGONUM BALDSCHUANICUM. A white flowered climber, hardy in high veld, 1/- each; 10/- per dozen.

TECOMA. See Bignonia.

VIRGINIAN CREEPERS. Fine for covering walls, their blood red foliage looks very pleasing in autumn, hardy.

VEITCHII. Self-climbing small ivy leaved, 1/6 each; 15/- dozen.

QUINQUEFOLLA. Robust growing, not self clinging, good for covering rough stone walls and fences. 1/6 each; 15/- dozen.

WISTERIA or **GLYCINE**. A trailing plant growing to a tremendous height. Fine for covering old dry trees, also suitable for growing in pergolas. Very hardy, Blue White and Purple shades 1/6 to 2/6 each.

COLLECTIONS of six hardy climbers. Our selection of varieties at 7/6 delivered free on rails, Marico.

HEDGING PLANTS. — LANINGPLANTE.

The cause of hedges dying off is frequently the impenetrable and poor state of the subsoil. Before attempting to plant a hedge, dig a trench 3—4 feet deep and 1½ to 2 feet wide, according to the nature of the ground, and rock formation found in the trench should be removed and replaced by good soil. If available place a good layer of manure right at the bottom of the trench before filling up the excavated soil. The Hedging is then planted according to distances given with each variety.

ALBELLA RUPESTRIS. Suitable for low hedges. 2—4 feet high, dark glossy green leaves, very hardy, evergreen. 10/- per hundred in flat tins. Plant 18 inches apart.

BOXWOOD. Suitable for dwarf evergreen borders. Abundantly producing small double white flowers. Plant 12 inches apart. Strong plants in single tins, 1/- each; 10/- per dozen. In flat tins, 12/- per hundred.

CUPRESSUS LUSITANICA and ARIZONICA. For drought resisting evergreen hedges 5—10 feet high. Plant 18 inches apart. In single tins, 1/- each; 8/- per dozen. In flat ins, 10/- per hundred.

CESTRUM MAUVE. For flowering hedges, 5—6 feet high, 5/- per dozen, from open ground in Winter, plant 2 feet apart. 30/- per hundred.

DEUTZIA CRENATA. White flowering from open ground in winter, 2 feet high 6/- per dozen, plant 2 feet apart.

DODONEA VISCOSA. Evergreen. Plant 18 inches apart. Attains a height of 6—10 feet. 10/- per hundred in flat tins.

HAKEA SALIGNA. A fine hardy and dense growing, evergreen hedging plant. Set 18 inches apart. 20/- per hundred in flats.

HONEYSUCKLE. The Scented Woodbine. Sweetly scented creamy yellow flowers, produced throughout the summer, practically evergreen. Should be planted along a wire fence for support, the plants will cover the entire fence within a year and form an impenetrable hedge. Plant 2 feet apart. In flat tins, 15/- per hundred.

JASMINUM. Yellow flowering evergreen, for low wide hedges, 4—6 feet high. Plant 18 inches apart. 15/- per hundred in flat tins. From open ground, 10/- per hundred.

PRIVET CHINESE. *Ligustrum lucidum*, large leaves, forms a thick hedge, frost and drought resisting. Plant 18 inches apart. 10/- per hundred; 90/- per thousand.

PRIVET, GREEN JAPANESE. Drought resisting, evergreen for hedges 6—10 feet in height, 10/- per hundred or 85/- per thousand. Plant 18 inches apart.

PRIVET Indian. *Ligustrum indicum*. Thick light green leaves, hardy and compact growing. For hedges 3—5 feet high. 15/- per hundred in flat tins. Plant 2 feet apart.

PRIVET GOLDEN LEAVED. For dwarf hedges, 2—3 feet high. Plant 18 inches apart. In single tins, 1/- each; 10/- per dozen.

POMEGRANATE. Double yellow, red and mottled. Plant 2 feet apart. In single tins, 10/- per dozen. From open ground in winter, 5/- per dozen; 30/- per hundred.

PINUS INSIGNIS. For high shelter hedges. 10 to 15 feet high. In flat tins, per hundred, 10/-. Plant 3 feet apart.

PYRACANTHA COCCINEA. Useful hardy hedge plant with bright red berries, evergreen. Grows 4—6 feet in height. 15/- per hundred, in flat tins. Plant 18 inches apart.

PYRACANTHA ANGUSTIFOLA. Similar to above, but orange yellow berries. 15/- per hundred in flat tins.

QUINCES. Large fruited varieties, assorted. Plant 3 feet apart. 60/- per 100.

FIGS. Assorted varieties. Plant 3 feet apart 60/- per hundred.

ROSA MULTIFLORA. Forms a dense impenetrable hedge. Plant 2 feet apart. 4/- per dozen; 20/- per hundred.

THUJA ORIENTALIS. (*Arbours vitae*). Evergreen. Plant 18 inches apart. Forms a hedge 8 to 12 feet in height. In flat tins, 10/- per hundred; 90/- per thousand in single tins, 1/- each; 10/- per dozen.

JOHANNESBURG.

18-9-37.

The whole of my order for shrubs, trees, etc., arrived in perfect condition, and all are doing well in my garden.

ORNAMENTAL AND AVENUE TREES. — SIERBOME.

Plant out of tins throughout the year, all established in tins, unless otherwise stated.

SPECIAL PRICED COLLECTIONS OF TWELVE CHOICE ORNAMENTAL TREES, our selection of varieties, 12/-, 15/- and 18/- per dozen; 90/-, 110/- and 130/- per hundred, in assorted varieties.

ACACIA BAEYANA. Golden Wattle, drought and frost resisting tree. 20 ft. high. Golden yellow flowers, 1/6, 2/-, 2/6 each; 15/-, 20/-, 25/- dozen.

ACACIA CULTRIFORMIS. A tree growing 12 feet high with triangular foliage, pretty yellow flowers, 1/6 and 2/6 each; 15/- and 25/- per dozen.

ARAUCARIA BIDWILLII. (*Bunya Bunya Pine*). For colder districts as the former. Attains 30 feet. Quick growing and simmetrically build. 3/6 and 4/6 each.

ARAUCARIA COOKII. A fine ornamental tree, does well as a solitaire, or as a avenue tree. 25—30 feet high. 1/6 and 2/6 each.

CUPRESSUS ARIZONICA and LUSITANICA. Drought and frost resisting. In single tins, 1/- each; 8/- per dozen; in flats, 10/- per hundred.

CUPRESSUS PYRAMIDALIS. Erect growing pillar Cypress. In single tins, 1/-, 1/6 and 2/6 each; 10/-, 15/- and 20/- per dozen; in flats, 10/- per hundred.

CASUARINA CUNNINGHAMII. A drought resisting tree, attaining a height of 25 to 30 feet, evergreen and frost resisting, 1/6 each; 15/- per dozen, 12/- per hundred in flats.

CALLITRIS. A Cypress-like tree, grows to a height of 25 feet, frost resisting, 1/6 each.

CEDRUS DEODAR. Attains a height of 30 to 40 feet. Of all the conifers by far the finest in form and stately beauty. Frost and drought resisting. 1/6, 2/6, and 3/6 each, according to size; 15/-, 25/- and 30/- dozen.

CRYPTOMERIA JAPONICA. An evergreen tree from Japan, attaining a height of 30 feet, fast and straight growing. Stands very cold climates. 2/6 and 3/6 each; 25/- and 35/- per dozen.

CYTISUS LABURNUM. Golden chain, a bright yellow flowering tree, about 15 feet high, good for avenues or as shade trees, frost and drought resisting. In tins 1/6 each; 15/- per dozen; larger size 2/6 each; 25/- dozen.

EUCALYPTUS FICIFOLIA. Red flowering gum, wants sheltered spot on Highveld, 1/6 and 2/6 each; 15/- and 25/- per dozen. Grows 18 to 20 feet in height.

EUCALYPTUS CALOPHILLA. White flowering gum, requires shelter on Highveld. Attains the same height as the former. 1/6 each; 15/- per dozen.

- FRAXINUS AMERICANA.** American ash, a hardy and drought resisting avenue tree, attaining a height of 30 feet. In tins 1/- each; 10/- per dozen.
- GREVILLEA ROBUSTA.** Fairly hardy, will not stand in exposed position of Highveld. The Silver Oak grows to a height of 30 feet. A fine shade and avenue tree. In single tins, 1/-, 1/6, 2/- and 2/6 each; 10/-, 15/-, 20/- and 25/- per dozen. In flat tins, 12/- per hundred.
- HAKIA SALIGNA.** Hardy in most parts, a fine shade tree 1/6 each; 15/- per dozen.
- JACARANDA MIMOSAEFOLIA.** Pretty flowering tree, grows up to 20 feet in height. In flat tins, 12/- per hundred; in single tins, 1/-, 1/6, 2/- and 2/6 each; 10/-, 15/-, 20/- and 25/- per dozen. In flat tins, 12/- per hundred.
- KARREE TREES.** Evergreen shade trees, drought resisting. In flat tins, 10/- per hundred.
- LIGUSTRUM.** (Chinese Privet). A handsome, white, flowering tree, with large glossy leaves, excellent for Avnues. Attaining a height of 12 to 15 feet. Standards of above, 4 to 5 feet high with nice bushy crowns, 2/6 each, 25/- per dozen in tins; 2/- each, 20/- per dozen from open ground.
- LOQUAT.** Large fruited, an evergreen shade tree, 1/- each; 10/- per dozen, 85/- per hundred.
- PEACH, Double flowering.** These Peaches flower before their foliage appears, and are the earliest trees in bloom. Fine for planting as solitaires on the lawn or amongst groups of conifers.
- Chrysanthemum Flowered Pink, White Double Flowering, Red Double Flowering,** 1/6 and 2/6 each from open ground; 3/6 in tins.
- PEPPER TREE.** A hardy shade and avenue tree. Attains a height of 15 feet evergreen. 1/- and 1/6 each; 10/- and 15/- per dozen.
- PINUS (Pine Trees).** Suitable for windbreaks, avenues and shade trees, attain a height of 25—30 feet, evergreen coniferous trees.
- INSIGNIS.** Remarkable Pine, light green foliage, very quick growing. In single tins, 1/-, 1/6 and 2/- each; 10/-, 15/- and 20/- per dozen. In flats, 10/- per hundred.
- HALEPENSIS.** Aleppo Pine. Dark green foliage, 1/-, 1/6 and 2/- each; 10/-, 15/- and 20/- per dozen.

MARAISBURG,

20-6-37.

The trees I got from you from time to time are doing very well and have borne very heavily this year.

- PLATANUS.** Plane Tree. Excellent for avenues and as a shade tree, in tins, 2/- and 3/- each; 20/- and 30/- per dozen; 1/6 each, 15/- per dozen from open ground.
- POPLARS.** Suitable for windbreaks, avenues, and shade trees. Attain a height of 30—35 feet. From open ground 1/- each; 10/- per dozen; 70/- per hundred. In single tins 1/6 and 2/- each; 15/- and 20/- dozen.
- Populus Canescens.** The common poplar, suckers freely and useful for planting in dongas, etc., to arrest soil erosion.
- Populus Deltoidea.** A very fast growing tree, probably the best Poplar for sub-tropical country. Withstands frost.
- Populus Nigra** (Lombardy Poplar). A good avenue tree, tall growing and hardy.
- Populus Serotina.** Very hardy fast growing, one of the best kinds to plant for timber. A good avenue and shade tree.
- Populus Wislinzenii.** A very hardy shade tree, thriving well under fairly dry conditions.

PRUNUS VESUVIUS. Grows about 12 feet high, a dark red leaved ornamental plum, used for foliage effects. From open ground, 1/- and 1/6, in tins, 2/- to 2/6 each.

STERCULLA ACERIFOLIA. Flame tree. A handsome tree, attaining a height of 20—30 feet, red flowers, suitable for districts where only light frosts occur. 1/6 and 2/6 each; 15/- and 20/- per dozen.

STERCULLA DIVERSIFOLIA. Currajong, hardy to drought and more hardy to frost than the former. 5—20 feet high. 1/6 each.

STERCULLA PLANTANIFOLIA. A pretty and hardy ornamental tree, grows 30 feet high, 1/- each, 10/- per dozen in tins.

THUJA ORIENTALIS. (*Arbor vitae*). Attains a height of 25 feet, 1/- each in tins; 10/- per dozen. Evergreen and hardy. In flats 10/- per hundred.

TUNG NUT TREES. A 30 feet high quick growing tree, withstands a fair amount of frost. Large leaves, flowers pinkish white. Good for avenues. 1/3 each; 15/- per dozen; 85/- per hundred.

WILLOW. *Salix babylonica*. Weeping willow, 1/6 each; 15/- per dozen, in tins; 9d. each, 8/- per dozen, 55/- per hundred, from open ground in winter.

STANDARDS OF FLOWERING ORNAMENTALS.

These are established in tins and have a clean stem of 3—6 feet in height and a nicely trimmed crown, suitable as solitaires on the lawn, or planted on either side of garden paths would be most effective.

HIBISCUS SYRIACUS. Double purple. Withstands frost. 3/6 each; 6/- per pair.

PRUNUS VESUVIUS and TRILOBA. 4/6 each; 8/- pair.

CHINESE PRIVET (*Liqustrum Lucidum*) 4 to 5 feet high with nice bushy crowns, 2/6 each, 25/- per dozen in tins; 2/- each, 20/- per dozen from open ground.

GUM TREES. — GOMBOME.

For planting during the rainy season.

VARIETIES IN STOCK: *Eucalytus viminalis*, *Eucalyptus rostrata*,
Eucalyptus saligna.

PRICES: In stock tins, 6/6 per hundred; 50/- per thousand.

Any other variety supplied if booked. Lowest quotations for quantities.

ORNAMENTAL AND FLOWERING SHRUBS.—SIER- EN BLOMSTRIJKE.

Plant out in tins throughout the year, all established in tins unless stated otherwise.

COLLECTION OF TWELVE BEAUTIFUL FLOWERING SHRUBS, established in tins, our selection of varieties, 12/-, 15/- and 19/- per hundred, 90/-, 110/- and 130/-, in 25 varieties, according to size, free on rails, Marico Station.

ABELLA RUPESTRIS. Hardy evergreen shrub, 3—4 feet high, tubular flowers, white tinted pink, 1/- and 1/6 each; 10/- and 15/- per dozen.

ACACIA BAILEYANA. Evergreen tree, of small size, yellow flowers produced abundantly in spring. Hardy, 1/6 to 2/6 each.

ACACIA CULTRIFORMIS. A small tree with triangular foliage, pretty yellow flowers, 1/6 and 2/6 each.

ABUTILON. Most beautiful flowering shrubs 4—6 feet high, require protection on the Highveld.

DOUBLE PINK. Flowers 2—4 inches in diameter, 1/6 each.

SINGLE. Yellow. Veined red, 2/6 each.

VEGETABLE SEEDS.

OF THE BEST STRAINS, PURE AND RELIABLE.

Our seed is always fresh, arriving every month from Europe.

HINTS ON SOWING AND RAISING OF SEEDS.

The **Soil** into which the seeds are sown should be in a perfect state of cultivation, but do not have this soil as rich in manure as the field into which the young plants are transplanted, otherwise you will find your plants later on starving.

Covering. — Very small and tiny flower seeds are best covered with a sprinkling of light pure sand or leaf mould, firmly pressed down so as to bring the seed in contact with the soil below. Larger and all vegetable seed are sown in beds and hoed in lightly with a rake.

Shading.—All seeds sown in beds, tins or boxes, must be covered and shaded from the sun. Grass matting or canvas is best suited for this purpose. The shading should gradually be lessened as the seedlings appear.

Sowing.—Do not sow too thick, or force growth too rapidly, as otherwise the young plants grow too tall and tender and will be more easily affected and checked by adverse weather conditions.

Transplanting.—Plant and cover the young plants with earth up to the first leaves on the stem to withstand drought, and water immediately and freely afterwards.

Watering.—Seed beds and boxes should never show a dry surface crust; one good watering daily will be found sufficient to avoid this.

General.—Do not sow out all your seed of a kind at one time, for plants of different ages are naturally differently affected by adverse circumstances. Remember that with doubl flowering plants, such as Carnations, Petunias and others the weakest plants generally produce afterwards the best doubles.

Calender.—A sowing and planting calender for the whole year will be found at the end of this Catalogue. The months best suited for sowing will be found indicated after the name of plants or flowers.

PYLKOP,

9-6-36.

Since I first purchased seeds, plants and trees from you I have given no other firm my patronage. Your seeds never fail to germinate and grow. I have never had a failure yet with everything I have bought from you.

Italian Giant. Late	1/6	4/6	14/6

CELERY—SELDERY. Sow in early Spring, in November set out in trenches, 18 ins. deep, well manured. Earth has to be drawn gradually to the plants. Celeriac plant on level well manured ground 3 ozs. of seed will plant one acre. Germinates in 14—16 days.

All varieties at 4d. per packet.	Per oz.	$\frac{1}{4}$ lb.	lb.
Brydons Prize. Blanching, crisp and juicy	1/3	4/-	—
Giant Prague. Turnip rooted, Celeriac	1/3	—	—

CHICORY—SIKORIE. See under Farm Seeds.

— — 2/3

CHINESE CABBAGE or PETSAL. Sept.-Oct. to March

Improved Canton. A very nice vegetable, served the same as cabbage. In appearance it resembles a Cos Lettuce with a distinct celery flavour. Sow and cultivate the same as Cabbage. Germinates in 4—6 days 4d. packet

1/3 4/- —

CUCUMBER—KOMKOMER. Sow in Spring after the cold weather has past, on well prepared soil. Make rows 4 feet apart, place 2—3 seeds in holes an inch deep and 8—10 inches apart. Thin out until strong single plants are left 2 feet apart; when hoeing draw the soil to the stems. 1 oz. of seeds produces about 250 plants. Germinates in 5 to 8 days.

All varieties at 4d. per packet.	Per oz.	$\frac{1}{4}$ lb.	lb.
Boston Market. Half long green, smooth	9d.	2/-	6/-
Long Green Prickly. Very prolific and large	9d.	2/-	6/-
Long Green Athens. Smooth, cylindrical, excellent	9d.	2/6	8/6
Japanese Climbing. Grows on trellis, early	9d.	2/6	—
Gherkins. Small green pickling	9d.	2/6	—

CRESS—KERS. So wthroughtout the year in rows 12 inches apart, in a cool shady situation. Germinates in 6—8 days.

Extra Curled 4d. packet; per oz. 9d.; $\frac{1}{4}$ lb. 2/-

EGG PLANT—EIPLANT. So wearily in Spring in beds and transplant in rows feet apart. A nourishing and loose soil is essential. 1 oz. produces 800 to 1,000 plants. Germinates in 10—12 days.

		Per oz. $\frac{1}{4}$ lb.	
Black Beauty. Round purple fruit of an enormous size			
per packet 4d.	2/-	6/6	
New York. Purple giant	1/6	5/-	
GOOSEBERRY. Sow in Spring in beds and transplant into rows 3 feet apart.			
Giant Fruited Cape	Per packet 4d.;	1/9	per oz.
HERBS—KRUIE. Indispensable for kitchen use, sow throughout the year, in flat tins or boxes under shelter, and transplant when large enough.			
Borage, Lavender, Chervil, Dill, Majoram, Thyme, Rosemary, Basil, Savory, Sage, all at 4d. per packet.			
Large mixed packets of Herbs per packet, 4d.; per oz. 1/6.			
COLLECTIONS of 10 varieties, one packet of each, post free, 2/6.			
KOHLRABI—KNOLKOOL. Sow throughout the year in succession in beds, set plants out whenever they are strong enough, in well manured soil, 12 to 18 inches apart. 1,500 plants per oz. of seed. Take 4—6 days to germinate.			
	Per oz.	$\frac{1}{4}$ lb.	lb.
Purple. Early, smooth	4d. per packet	9d.	1/6 4/6
Green. Early smooth	4d. per packet	9d.	1/6 3/6
LEEK—PREL. Sow broadcast in beds throughout the summer, plant afterwards in strong freshly manured soil, rows eight inches apart and plants 6 inches distance in the rows, set plants somewhat deeper as they stood in the seed bed. 1 oz. to 200 feet of drill. Germinates in 12—15 days.			
	Per oz.	$\frac{1}{4}$ lb.	lb.
Carentan. Giant. For winter sowing, 4d. per packet	9d.	1/6	4/6
Broad Leaved Flag. For summer sowing, 4d. packet	9d.	1/6	3/6

VOLKSRUST,

23-11-36.

All the seeds I have ordered from you have proved very satisfactory.

LEETUCE—SLAAI. Sow thinly in rows on well manured soil 10 inches apart thin out plants in the rows to about the same distance. Water freely in hot weather. Lettuce may be sown practically throughout the season. 1 oz. of seed will sow 400 ft. of drill. Germinates in 8—10 days.

All varieties at 4d. per packet. Per oz. $\frac{1}{4}$ lb. lb.

American curled or gathering. Prize head for winter	9d.	1/6	5/6
Corn Salad. Green cabbaging, rosette shaped	9d.	2/-	7/-
Chicory Lettuce Witloff	6d.	1/-	3/-
May King. Cabbage Lettuce, hard and crisp	9d.	1/6	4/6
White Cos or Paris White. Summer variety	9d.	1/6	5/6
Stonehead or Tennisball Cabbage Lettuce Compact	9d.	1/6	4/6
Trainon. White self-folding Cos. Excellent	9d.	1/6	5/6

SWEET MELON—SPAANSPECK. To have early fruit, sow in flat tins about 40 seeds in each tin in July and keep watered in a frost free and well lit place. The plants will then be ready to plant out after the cold weather. Seeds can also be sown on the spot in the open as soon as there is no danger from frost. Plant 3 feet apart. 250 plants will be produced by an oz. of seed. Germinates in 5—8 days.

All varieties at 4d. per packet. Per oz. $\frac{1}{4}$ lb. lb.

Nutmeg, a fine aromatic variety, green fleshed, very large, weighing up to 18 lbs.	1/3	4/-
Surprise, salmon fleshed, oblong, greenish yellow a great favourite	1/3	4/-
Winter Melon, a green-fleshed variety deeply ribbed and netted of good keeping quality	1/3	4/-

WATER MELONS—WATLEMOEN. All varieties 4d. per packet, 100 to 120 plants will come out of 1 oz. of seed. Plant 6 ft. apart, germinates in 6—10 days.

E.: Early; M.: Midseason; L.: Late.

Fordhoek Early. E. The melons are slightly oval, weighing about 20 lbs. each. Luscious, sweet rich pink fleshed	Per oz.	$\frac{1}{4}$ lb.	lb.
.....	9d.	1/6	5/6
Florida Favourite. E. Long shaped, flesh red	9d.	1/6	5/6
Halbert Honey. M. Rich crimson flesh, the sweetest of all melons. The fruit weighs up to 30 lbs. each	9d.	1/6	5/6
Ice Cream. E. Oblong, crisp red flesh	9d.	1/6	5/6
Mammoth Ironclad. L. Long shaped, rose flesh	9d.	1/6	5/6
Tom Watson. L. Elongated, bright red flesh, melons weighing up to 40 lbs. each	9d.	1/6	5/6

Copper King. Red flattish globe, large size	9d.	2/3	6/6
Prize-Taker. Large pear-shaped dull yellow skin, very mild flavour	1/-	2/3	7/6
Silver King. White flattish globe, keeps well	9d.	2/-	6/6
White Queen. Small, for pickling	1/-	3/-	—
Zittau Giant. Yellow globe, long keeping	9d.	2/-	7/6
Spring Onions or Shallots	4/-	—	—
Chives. Tender green	1/6	—	—

BRENTWOOD PARK,

16/4/36

The seeds I got from you are coming up splendidly, and I am highly satisfied.

PARSLEY—PETERSELIE. Best sown early Spring or in Autumn in light rich soil. Distribute the seed thinly and cover lightly, thin out well. 1 oz sows a row of 250 feet. Germinates in 14—18 days.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Hybrid moss curled. Garnishing	9d.	2/-	—
Long turnip rooted 4d. packet			

PARSNIP—PASTINAAK. Soil must be deeply dug out but not freshly manured. Along the drills sow every 5—6 inches a cluster, thin out later leaving only the sturdiest plants. Parsnips are sown from November to February. Sow 1 oz. to 300 feet of row. Germinates in 10—14 days.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Hollow Crown. Long smooth 4d. packet	6d.	1/-	2/6
Turnip rooted, for shallow soils 4d. packet.	6d.	1/-	3/-

PEAS—ERTE. They are sown in Autumn from February to May, to be ready for market during the winter months. Sow in drills on any good soil. 1 lb. of peas will sow a row 120 ft. long, in drills 40 to 50 pounds are required per acre. Small sowings for the kitchen garden may be made throughout the year, of the round seeded varieties. 1 lb. of seed will sow 120 feet row. Germinates in 8—10 days.

All varieties of Peas, 6d. per packet.

	Per lb.	10 lbs.	25 lbs.
Alderman. 5 feet wrinkled. Imported seed	1/-	6/-	14/-
Fillbasket, 2½ feet round seeded. Imported seed	1/-	5/6	13/6
Green Feast. 2 ft. wrinkled. Imported seed	1/-	6/6	15/-
Stratagen. Wrinkled 2 feet. Imported, 100 lbs. 50/-	9d.	5/6	13/-
Sugar Peas, Mammoth Luscious, Grey seeded, wrinkled, enormous fleshly pods, can be cooked whole. Imported	1/6	12/6	30/-
Telephone. Wrinkled, 3 feet, long podded, imported	1/-	6/6	15/-
Colonial Seeds. Available from Stratagem. Reputed stock 100 lbs. 34/-	6d.	4/-	9/-
Marrowfat. Wrinkled, mixed colonial, reputed stock 100 lbs. 25/-	4d.	3/-	7/-

PUMPKIN—PAMPOEN. Sow after frost is over between mealies. They like plenty manure. 100 to 120 plants will come out of 1 oz. of seed. Germinates in 6—8 days.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Plat-Vaatjie. A fine colonial variety	6d.	1/-	3/6
Boer Pumpkin. Good keeper	6d.	1/-	3/6
Mammoth Table Excellent	6d.	1/-	3/6
Iron Bark. Excellent for storing	6d.	1/-	3/6
Cattle varieties, Mixed	6d.	9d.	2/-

RADISH—RADYS. Sow throughout the season in succession. Soil must be of a good depth and loose, early sowings like a warm position; later on places somewhat moist and shady suit better. 1 oz. of seed required per 100 feet of drill. Seed germinates in 5—8 days.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Ruby. A new Radish. The attractive ruby red coloured roots are crisp and juicy	6d.	1/-	2/6
Chartiers. Bright rose coloured roots, 7—8 ins. long	6d.	1/-	2/6
French Breakfast. Olive shaped, white tipped	6d.	1/-	2/6
Sparkler or White Tipped Scarlet Turnip. Round	6d.	1/-	2/6
Black Spanish. Round, coal black, white flesh	9d.	1/6	—
White Icicle. Long snow white roots, fine mild flavour	6d.	1/-	2/6

RHUBARB—RHABARBER. Sow in beds in early Spring or in Autumn and transplant in permanent situation during the winter months. Set plants 2 feet apart on well manured ground, plenty water and manure is needed in subsequent years. 1 oz. of seed to 150 feet of row. Takes 8—10 days to germinate.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Queen Victoria. Yellow stalks 4d. packet	1/-	2/6	9/6
New Crimson Winter. Everbearing 4d. packet	1/9	5/-	15/-

SALSIFY or VEGETABLE OYSTER. Sow from Sept. to November thinly in well prepared soil. The plant is highly esteemed for the fine flavour of the roots, which is not unlike that of oysters. 2 ozs. of seed to 100 yards of row.

Per oz. $\frac{1}{4}$ lb.

Mammoth Sandwich Island 6d. packet 1/- 3/-

SAVOY—See under Cabbage.

SHALLOT—**SALOT**—See under Onions; also **SPRING ONIONS**, 6d. packet.

SORREL—**SURING.** Sow the same as Herbs.

Broad leaved French 4d. packet; 2/- per oz.

SPINACH—**SPINASIE.** Sow on the spot in drills 10 inches apart, on well prepared but not freshly manured garden soil. During the hot and dry summer it will be advisable to sow New Zealand Spinach as it will stand excessive heat and draught. It takes 1 oz. of seed to sow 100 feet of drill. Germinates in 5—20 days.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Monstrous Viroflay. Savoy leaved, very productive	6d.	1/-	2/6
New Zealand. Summer spinach, perennial	6d.	1/-	3/6
Rueil, Long Standing. New, broad leaved, heat and drought resisting very slow to run to seed	6d.	1/-	2/6

BUFFELDOORN,

5-2-36.

Stuur my asseblief die volgende saad, die saad wat ons van u gekry het, het pragtig opgekom.

SQUASH—**VROË PAMPOEN.** Sow after the cold weather is over in deep rich soil. Can be planted up to the end of December. 100 to 120 plants will come out of 1 oz. of seed. Requires plenty manure, germinates in 6—8 days.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Improved Hubbard. Oblong of immense size	9d.	2/-	7/-
Custard Bush. Known as Electors Cap	9d.	2/-	7/-

STRAWBERRIES—**AARBEIE.** Sow September to January in boxes under shelter, when large enough transplant into the open, setting the plants 18 inches apart in the rows, the latter being 2 feet 6 inches apart.

Mixture of large fruited sorts 6d. per packet.

SWISS CHARD or **SPINACH BEET.** Sow from August to February in good soil well enriched, either broadcast or thickly in rows 1 foot apart. The young leaves are a summer substitute for Spinach, or the midribs may be used like Asparagus. 1 oz. of seed will sow 80 feet. Germinates in 8—10 days.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Lucullus. Yellow with ribs. 4d. packet	6d.	1/-	2/6

TOMATO—**TAMATIES.** For early fruit on the highveld make sowing in August in boxes under shelter or in a warm spot. Later sowings can be made in the open ground in beds; seed takes about 14 days to germinate, somewhat longer with heavy sowings on account of cooler temperature. In localities where no winter frosts occur sow in Autumn for winter fruiting. Transplant when strong enough, setting the plants 2 ft. 6 ins. apart each way. Soil to be deep and well manured, 1 oz. of seed produces about 700 to 1,000 plants.

	Per pkt.	Per oz.	$\frac{1}{4}$ lb.	lb.
Golden Queen. Bright yellow, large smooth early	4d.	1/6	6/-	—
Beauty. Deep red, for winter fruiting	4d.	2/-	7/6	—
San Marzano. Best for preserving whole	4d.	1/-	3/6	—

	Per pkt.	Per oz.	$\frac{1}{4}$ lb.	lb.
Mikado. Bright scarlet, early	4d.	1/6	5/-	—
Phenomen. Dark crimson, very early	4d.	1/6	5/6	—
Earliana. Smooth scarlet fruit, very early	4d.	1/6	5/6	—
Sunrise. Bright scarlet fruit, early	4d.	1/6	5/6	—
Trophy. Large deep red, late	4d.	1/6	5/6	—
Market Garden Mixture of smooth large fruited varieties, highly recommended	4d.	1/3	4/6	—

TURNIPS—KNOL. Sowings are made in succession from August until April in beds broadcast. The rutaba varieties, in drills 20 inches apart, thin out in the rows to the same distance. Turnips require rich but not freshly manured soil. 1 oz. sows 300 feet of drill; 2 lbs. per acre. Takes 4—6 days to germinate.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Golden Ball. Dark yellow, piquant flavour	6d.	1/-	2/6
White Globe or Six Weeks. Very Early, strap leaved	6d.	1/-	2/6
Milan. Strap-leaved, purple top, superior quality	6d.	1/-	2/6
White smooth short leaved Swedish Turnip or Rutabaga	6d.	1/-	2/6
Yellow smooth Swedish Turnip or Rutabaga	6d.	1/-	2/6

VEGETABLE MARROW—GROEN PAMPOEN. Sow when danger of frost is over on well manured soil. The bush varieties in rows 4—5 feet and the trailing varieties 6—8 feet apart. Germinates in 6—8 days. 1 oz. of seed will produce 80—100 plants.

All varieties at 4d. per packet.

	Per oz.	$\frac{1}{4}$ lb.	lb.
Table Dainty. Medium sized, oblong, of finest flavour vinning habit	9d.	2/-	6/-
Long White. Bush variety, heavy bearer	9d.	1/6	5/-
Italian Napoli. Green trailing, very productive	9d.	1/6	5/-
White Asparagus. Long white trailing	9d.	1/6	5/-
Long Green Bush Variety	9d.	1/6	5/-
Orange Queen. Round creamy orange coloured fruit of fine flavour	9d.	2/-	7/-
Garden Mixture of all varieties Vegetable Marrow	9d.	1/3	4/6

FARM SEEDS — LANDBOUSADE.

NOTE.—Prices of Farm Seeds are subject to market fluctuations.

ROOT CROPS FOR CATTLE, PIG AND POULTRY FEEDING.

Root Crops are one of the most important classes of farm seeds. Their high nutritious value makes them a very desirable stock feed. The roots store readily throughout the winter. Mangelwurzel and Sugar Beet are a milk food par excellence.

CARROTS—GEEL WORTELS. Sow November to May, 4—5 lbs. per acre in drills. Broadcast use 7 lbs. Distance of rows 18 inches. Germinates in 10—12 days.

	Per lb.	5l bs.
Giant Long Red. Thick rooted superior	3/-	14/6

PATENTIE,

I am very satisfied with the seeds I got fro myou.

MANGELWURZEL or MANGOLD—MANGELWORTEL. Sow September to April in drills, 10 lbs., broadcast 15 lbs. per acre. Distance of rows 2 feet 6 inches. Germinates in 8—12 days.

	Per lb.	5 lbs.	25 lbs.
Mammoth Long Red. Selected superior quality	9d.	3/—	15/—

Collection of twelve packets Forest Tree Seeds, 5/- post free.

KLERKSDORP,

7-2-38.

The Dahlia seeds I had from you were the best I ever planted. They are flowering now. There are some lovely flowers amongst them.

FLOWER SEEDS. — BLOMSADE.

NOVELTIES.

CROWN OF GOLD. A new type of Marigold, unusual and attractive. The flower looks like a Chrysanthemum. Crown of Gold is delightfully sweet scented and with entirely odorless foliage. 9d. per packet.

PAPAVR RHOEAS. "All Double". A special reselected Ranunculi Poppy with practically all double flowers. The plants about 30 inches high, flower in the richest display of colours: Crimson, Scarlet, Carmine, Dark and Light Pink, Salmon shades, besides Pink and White edged, Scarlet on White ground, if cut as buds, very fine for vases. Per packet 1/6.

HOLLYHOCK—STOCKROSE.

Exquisite; double mixed, large flowers with curled, fringed white margined petals 1/-

PAPAVR ORIENTALE, OLYMPIA—Olympia is the finest double large flowering perennial Poppy from seed. For the present about 50% come double, we do not hesitate to recommend this novelty. The gardener can easily and quickly propagate the plants with double flowers.

A further advantage of this novelty is its early flowering time. The large scarlet flowers on the 30—36 inch high plants can be seen from afar. 1/6 pkt.

RUSSEL LUPINS—Russell Lupins are undoubtedly the most outstanding Novelty and herald the biggest advance ever made in Perennial Lupins.

The florets have wide flat standards and exceptionally large keels. The remarkable colour range contains many vivid shades, never seen before in Lupins. They are as follows:—Crimson, Bright Cerise, deep Mauve, Crison Orange, Pale Salmon, Rosy Crimson, Pink and White, Blue and Yellow, Strawberry Red and White, Deep Rose and Cream and many others. Awarded the Gold Medal, 1/6 packet.

LUPINS. "Evening Glow." "Evening Glow" is one of the finest Lupins produced yet, containing numerous shades of light and golden yellow, chamois, apricot, pink and deep red, the colour effect is like the sky at sunset. 1/- per packet.

COLLECTION OF FLOWER SEEDS. — BLOMSADE.

The undermentioned collections are selected by us with due regard to the respective districts, climatic and seasonal conditions, and will be found of the utmost value. We are also prepared to make up collections chosen by our customers; any varieties priced not higher than 6d. in our list may be included.

SWEET PEAS.—PRONKERTJE.

Sow : Winterflowering varieties January to May, and Summerflowering and Ruffled varieties March to May and August to September. 1 ounce of seed is sufficient to plant a single row of fifty feet.

Culture.—Have trenches dug 18 inches wide and 18 inches to 2 ft. deep; place a layer of well decayed manure at the bottom of the trench 4 to 6 inches in thickness, then fill in to the ground level. Make a furrow about three inches deep, if soil is heavy line this little furrow with a few buckets of sand, and sow the seeds about six inches apart. Cover one inch at first, as the seedlings advance keep on covering until the ground is level. The soil must be kept moist; if too dry seeds will not germinate for a long time; if too wet and the soil becomes caked they will not sprout at all.

SWEET SULTAN, double mixed, extra fine colours 4d.

SWEET WILLIAM—Duisendskoone; double, finest mixed 4d.

VERBENA HYBRIDA—
